

Chartered on September 15, 1989. The Board is composed of five members appointed by the Secretary of Commerce who are eminent in such fields as information resources management, information technology, and library and information services. The purpose of the meeting is to review and make recommendations regarding general policies and operations of NTIS, including policies in connection with fees and charges for its services. The agenda will include a progress report on NTIS activities, an update on the progress of FedWorld, and a discussion of NTIS' long range plans. The closed session discussion is scheduled to begin at 9:00 a.m. and end at 4:00 p.m. on June 7, 1995. The session will be closed because premature disclosure of the information to be discussed would be likely to significantly frustrate implementation of NTIS' business plan.

DATES: The meeting will convene on June 6, 1995 at 9:00 a.m. and adjourn at 4:00 p.m. and convene again on June 7, 1995 at 9:00 a.m. and adjourn at 4:00 p.m.

ADDRESSES: The meeting will be held in Room 2029, U.S. Department of Commerce, National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161.

PUBLIC PARTICIPATION: The meeting will be open to public participation on June 6, 1995 and closed on June 7, 1995. Approximately thirty minutes will be set aside on June 6, 1994 for comments or questions as indicated in the agenda. Seats will be available for the public and for the media on a first-come, first-served basis. Any member of the public may submit written comments concerning the Board's affairs at any time. Copies of the minutes, of the open session meeting, will be available within thirty days of the meeting from the address given below.

John T. Conway,
Chairman.

The three large gaseous diffusion plants that were operated by the Department of Energy (DOE) and its predecessors produced enriched uranium, some for defense use and some for incorporation into nuclear fuel for civilian reactors in the United States and other countries. In the course of isotope separation, most of the uranium ended up as the part depleted in U-235, designated as "tails" or "tailings". Enriched uranium at all desired assays was simultaneously extracted from the
