

equivalent (resource planning decisions). Further public participation will be sought during Allotment Management Planning NEPA analysis and public scoping.

Preliminary planning assessments (initiated in 1990) included: public sensing, data collection, and analysis for development of desired conditions. Public participation is especially important at several points during the analysis. Individuals, organizations, federal, state, and local agencies who are interested in, or affected by the decision are invited to participate in the scoping process. Your responses will be used in preparation of the draft EIS.

The Responsible Officials for this decision are Bert Kulesza, Forest Supervisor, Ashley National Forest, 355 N. Vernal Ave., Vernal UT 84078, and Bernie Weingardt, Forest Supervisor, Wasatch-Cache National Forest, 8230 Federal Building, 125 South State St., Salt Lake City, UT 84138.

To complete the scoping process, we need your comments by June 19, 1995. The next major opportunity for public input is the draft EIS. The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and be available for public review in July, 1995. The Final EIS and Record of Decision is expected in November, 1995.

The comment period on the draft environmental impact statement is 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that those interested in this proposed action participate at that time. To be the most helpful, comments on the draft environmental impact statement should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see *The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act* at 40 CFR 1503.3 in addressing these points).

In addition, Federal court decisions have established that reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *City of Angoon v. Hodel*, (9th Circuit, 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490

F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in a final.

Dated: May 5, 1995.

Forest Supervisor, Ashley National Forest.
