BILLING CODE 5000-04-M

Department of the Air Force**USAF Scientific Advisory Board
Meeting**

The USAF Scientific Advisory Board's Science & Technology Review of Advanced Weapons will meet on 5-9 June 1995 at Kirtland AFB, NM from 8:00 a.m. to 5:00 p.m.

The purpose of the meeting is to fulfill the yearly SAB Science and Technology Review in the area of Advanced Weapons.

The meeting will be closed to the public in accordance with Section 552b of Title 5, United States Code, specifically subparagraphs (1) and (4) thereof.

For further information, contact the Scientific Advisory Board Secretariat at (703) 697-8845.

Patsy J. Conner,*Air Force Federal Register Liaison Officer.*

BILLING CODE 3910-01-P

Corps of Engineers**Intent To Prepare an Environmental
Impact Statement and Notice of Public
Scoping Meeting****AGENCY:** Corps of Engineers, Omaha
District.**ACTION:** Notice of intent.

SUMMARY: The Metropolitan Utilities District (District), Omaha Nebraska, proposes to construct a 104 million gallon per day (MGD) well field near the Platte River in western Douglas and eastern Saunders Counties, Nebraska. The proposed project also includes a water treatment plant and transmission pipelines. The purpose of the proposed project is to provide additional public water supply to meet customer requirements through the year 2030 and to improve water source reliability for the District's growing service area.

The proposed action will require a Corps of Engineers' permit pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344), which authorizes the Corps of Engineers to issue permits for the discharge of dredged or fill material into the waters of the United States. In accordance with the National Environmental Policy Act of 1969 and implementing regulations, an environmental impact statement will be prepared to analyze the environmental impacts of the proposed action and alternatives. A public scoping meeting has been scheduled to solicit comments regarding the scope of the environmental studies.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and Environmental Impact Statement should be directed to: Mr. Richard D. Gorton, Chief, Environmental Analysis Branch, U.S. Army Corps of Engineers, 215 North 17th Street, Omaha, Nebraska 68102-4978; phone (402) 221-4598; fax (402) 221-4886.

SUPPLEMENTARY INFORMATION: The Metropolitan Utilities District (District) is the potable water supplier of Omaha, Nebraska, and the surrounding area. The District is experiencing a steady growth within its existing and expanding service area boundaries. It has determined that an additional 100 MGD supply would be required by the year 2030. It has also concluded that if peak day design conditions were to occur any year after 1995, the District would not be able to meet those demands. The District does not currently have any excess production capacity to provide reliability during peak water demand periods.

The proposed project would include a total of 42 wells in the Platte River

alluvial aquifer and associated pumping equipment, water transmission pipelines, a water treatment facility, and a 25-million-gallon storage reservoir. These facilities would deliver water to the western portion of the District's distribution system.

Alternatives to the proposed action identified to date include:

- Construction of well facilities in the Platte River alluvial aquifer in alternative locations;
- Construction of additional facilities to supply water from the Missouri River;
- No Federal action.

A public scoping meeting has been scheduled for June 1, 1995 at 7:00 p.m. at the Russell Middle School Cafeteria, 5304 South 172 Street, Omaha, Nebraska.

The purpose of the scoping meetings is to solicit public input on issues, studies needed, alternatives to be evaluated, and potential environmental effects. Written comments will also be requested.

Potential significant environmental issues include effects on threatened and endangered species and the indirect effects of drawdown on wetlands and recreational lakes.

Other applicable and pertinent environmental review and consultation requirements will be undertaken simultaneously with the NEPA process, including requirements of the Endangered Species Act, Fish and Wildlife Coordination Act, National Historic Preservation Act, Clean Water Act, Clean Air Act, and others.

Gregory D. Showalter,*Army Federal Register Liaison Officer.*
