### INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731-TA-696-698  
(Final)]

### Magnesium From China, Russia, and Ukraine

#### Determinations

On the basis of the record<sup>1</sup> developed in the subject investigations, the Commission determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. § 1673d(b)) (the Act), that an industry in the United States is materially injured<sup>2</sup> by reason of imports from China, Russia, and Ukraine of pure magnesium,<sup>3</sup> provided for in subheading 8104.11.00 of the Harmonized Tariff Schedule of the United States (HTS), that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV). The Commission further determines that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from China and Russia of alloy magnesium,<sup>4</sup> provided for in subheading 8104.19.00 of the HTS, that have been found by the Department of

<sup>1</sup> The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR § 207.2(f)).

<sup>2</sup> Chairman Watson, Vice Chairman Nuzum, and Commissioner Crawford dissenting.

<sup>3</sup> Pure magnesium encompasses: (1) Products that contain at least 99.95 percent primary magnesium, by weight (generally referred to as "ultra-pure" magnesium); (2) products containing less than 99.95 percent but not less than 99.8 percent primary magnesium, by weight (generally referred to as "pure" magnesium); and (3) products (generally referred to as "off-specification pure" magnesium) that contain 50 percent or greater, but less than 99.8 percent primary magnesium, by weight, and that do not conform to ASTM specifications for alloy magnesium. "Off-specification pure" magnesium is pure primary magnesium containing magnesium scrap, secondary magnesium, oxidized magnesium or impurities (whether or not intentionally added) that cause the primary magnesium content to fall below 99.8 percent by weight. It generally does not contain, individually or in combination, 1.5 percent or more, by weight, of the following alloying elements: aluminum, manganese, zinc, silicon, thorium, zirconium, and rare earths.

<sup>4</sup> Alloy magnesium contains 50 percent or greater, but less than 99.8 percent, primary magnesium, by weight, and one or more of the following: aluminum, manganese, zinc, silicon, thorium, zirconium, and rare earths, in amounts which, individually or in combination, constitute not less than 1.5 percent of the material, by weight. Products that meet the aforementioned description but do not conform to ASTM specifications for alloy magnesium are not included in the definition of alloy magnesium. In addition to primary magnesium, alloy magnesium may contain magnesium scrap, secondary magnesium, or oxidized magnesium in amounts less than the primary magnesium itself.
