DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Proposed Advisory Circular (AC) 23-XX-21, Small Airplane Certification Compliance Program

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of Proposed Advisory Circular (AC) 23-XX-21, and request for comments.

SUMMARY: This notice announces the availability of and request for comments on a proposed advisory circular (AC) which provides a compilation of acceptable means of compliance to

specifically selected sections of part 23 of the Federal Aviation Regulations (FAR) that have historically been deemed burdensome for small simple airplanes to show compliance. In general terms, a small simple airplane could be defined as non-turbine single engine, unpressurized, and under 4,000 pound maximum weight; however, applicability of these means of compliance remains the responsibility of the certification manager for each specific project. Utilization of these means of compliance does not affect the applicability of any other certification requirements that fall outside the scope of this AC. This material is neither mandatory nor regulatory in nature and does not constitute a regulation.

DATES: Comments must be received on or before July 17, 1995.

ADDRESSES: Send all comments on the proposed AC to: Federal Aviation Administration, Attention: Standards Office, ACE-110, Small Airplane Directorate, Aircraft Certification Service, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Terre Flynn, Regulations and Policy Branch, ACE-111, at the address above, telephone number (816) 426-6941.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this proposed AC by contacting the person named above under **FOR FURTHER INFORMATION CONTACT**.

Comments Invited

Interested parties are invited to submit such written data, views, or arguments as they may desire. Commenters must identify the AC and submit comments to the address specified above. All communications received on or before the closing date for comments will be considered by the Standards Staff before issuing the final AC. Comments may be inspected at the Standards Office, ACE-110, Suite 900, 1201 Walnut, Kansas City, Missouri, between the hours of 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

Background

Some industry and aviation organizations expressed concern that the typical means of compliance for some regulations might be more demanding than justified. As a consequence, industry, aviation groups, and the FAA formed a team to investigate the issue. Historical files, Designated Engineering Representatives (DER's), Aircraft Certification Offices (ACO's), and industry were used to determine target regulations and provide known means of compliance.

This AC is a compilation of the study results, listing the regulations and attendant means of compliance that offered an improvement in certification efficiency. The listed means of compliance have been found acceptable and historically successful, but they are not the only methods which can be used to show compliance. In some cases, highly sophisticated airplanes may require more accurate or substantial solutions.

Issued in Kansas City, Missouri, on May 9, 1995.

Henry A. Armstrong,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.
