

used in areas that can demonstrate an ability to meet the 1990 Clean Air Act deadlines for Reasonable Further Progress and attainment while implementing an I/M program that falls below the originally promulgated enhanced I/M performance standard. The proposed action would also revise the high enhanced I/M performance standard to include a visual inspection of the positive crankcase ventilation (PCV) valve on all light-duty vehicles and light-duty trucks from model years 1968 to 1971, inclusive, and of the exhaust gas recirculation (EGR) valve on all light-duty vehicles and light-duty trucks from model years 1972 through 1983, inclusive. The proposal also solicits public comment on whether or not EPA should include revised regulatory language in its final rulemaking which change the population cutoff for basic I/M from 50,000 persons to 200,000 persons. Lastly, the proposal would make clarifying amendments to the I/M requirements for areas undergoing redesignation.
