

Novel or Unusual Design Feature

The BHTI Model 222U helicopter, at the time of the application for modification by Heli-Dyne Systems, Inc., was identified as incorporating one and possibly more electrical, electronic, or combination of electrical and electronic (electrical/electronic) systems that will perform functions critical to the continued safe flight and landing of the helicopter. The electronic flight instrument system performs the attitude display function. The display of attitude, altitude, and airspeed is critical to the continued safe flight and landing of the helicopters for IFR operations in Instrument Meteorological Conditions.

If it is determined that these helicopters will incorporate other electrical/electronic systems performing critical functions, those systems also will be required to comply with the requirements of this special condition.

Discussion of Comments

Notice of Proposed Special Condition No. SC-94-3-SW was published in the **Federal Register** on December 27, 1994 (59 FR 66489). No comments were received. Therefore, the special condition is adopted as proposed.

Conclusion

This action affects only certain unusual or novel design features on one model of helicopter. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of these features on the affected helicopter.

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special condition is issued as part of the type certification basis for the Bell Helicopter Textron Model 222U helicopter:

Protection for Electrical and Electronic Systems From High Intensity Radiated Fields

Each system that performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these critical functions are not adversely affected when the helicopters are

exposed to high intensity radiated fields external to the helicopters.

[Docket No. 95-NM-69-AD; Amendment 39-9208; AD 95-09-05]

Airworthiness Directives; British Aerospace Model Avro 146-RJ Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects a typographical error that appeared in the applicability statement of the above-captioned airworthiness directive (AD) that was published in the **Federal Register** on April 28, 1995 (60 FR 20887). The typographical error in the applicability statement of the AD resulted in a reference to an incorrect part number.

DATES: Effective May 15, 1995.

The incorporation by reference of certain publications listed in the regulations was previously approved by the Director of the Federal Register as of April 28, 1995 (60 FR 20887).

FOR FURTHER INFORMATION CONTACT: Kirk Baker, Aerospace Engineer, Systems and Equipment Branch, ANM-130L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (310) 627-5345; fax (310) 627-5210.

SUPPLEMENTARY INFORMATION: Airworthiness Directive (AD) 95-09-05, amendment 39-9208, applicable to certain British Aerospace Model Avro 146-RJ series airplanes equipped with a certain Honeywell Standard Windshear Detection and Recovery Guidance System (WSS), was published in the **Federal Register** on April 28, 1995 (60 FR 20887). As published, that AD contained a typographical error in the applicability statement: the applicability statement indicated that the airplanes subject to the requirements of the AD were those equipped with Honeywell WSS having part number (P/N) 4048300-902; however the correct P/N is 4068300-902.

This document corrects the reference to the P/N cited in the applicability

statement of AD 95-09-05, to read as follows:

“Applicability: Model Avro 146-RJ70A, -RJ85A, and -RJ100A airplanes; equipped with Honeywell Standard Windshear Detection and Recovery Guidance System (WSS), part number 4068300-902; certificated in any category.”

Since no other part of the regulatory information has been changed, the final rule is not being republished.

The effective date remains May 15, 1995.

Issued in Renton, Washington, on May 12, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.
