Specifically, Columbia proposes to construct and operate twelve new points of delivery to Mountaineer Gas Company (MGC) all of which would be located in West Virginia and would have a total estimated design day and annual quantity of 18 Dth and 1,800 Dth, respectively. Columbia states that the quantities to be provided through the new delivery points will be within Columbia's authorized level of services and, therefore, there is no impact on Columbia's existing design day and annual obligations to the customers as a result of the construction and operation of the new points of delivery for firm transportation service.

Columbia estimates that the cost to install the new taps to be approximately \$150 per tap which will be treated as an O&M expense.
