Statement of Serious Damage

Men's and Boys' Wool Coats Other Than Suit Type—Category 434

April 1995

The sharp and substantial increase in imports of men's and boys' wool coats other than suit type, Category 434, is causing serious damage to the U.S. industry producing men's and boys' wool coats other than suit type.

U.S. imports of men's and boys' wool coats other than suit type, Category 434, surged to 189,180 dozen in the year ending January 1995, 40 percent above the same period a year earlier.

Serious damage to the domestic industry resulting from the sharp and substantial increase in imports of men's and boys' wool coats other than suit type is attributed to India and Brazil. The combination of high import levels, surging imports, and low priced goods from these countries have resulted in loss of domestic output, market share, investment, employment, man-hours worked, and total annual wages.

Total imports from the two countries listed above increased from 31,371 dozen in the year ending January 1994 to 55,269 dozen in the twelve months ending in January 1995, a sharp and

substantial increase of 76 percent. Together their year ending January 1994 imports were 23 percent of total Category 434 imports. Their share of total category imports increased to 29 percent in the year ending January 1995. Their year ending January 1995 imports were 36 percent of total U.S. production of men's and boys' non-suit type wool coats in the year ending September 1994.
