Notice of Annual Change in the Producer Price Index for Finished Goods, Minus One Percent

Issued May 19, 1995.

In Order No. 561, the Federal Energy Regulatory Commission issued a Final Rule adopting regulations to implement the requirements of the Energy Policy Act of 1992.¹ The Final Rule provides a methodology for oil pipelines to change their rates through use of an index system that establishes ceiling levels for such rates. The index system as set forth

¹ III FERC Stats. & Regs. ¶ 30,985 (1993); 58 FR 58753 (November 4, 1993).

in the Commission's regulations at 18 CFR 342.3 is based on the annual change in the Producer Price Index for Finished Goods (PPI-FG), minus one percent. The regulations provide that each year the Commission will publish an index reflecting the final change in the PPI-FG, minus one percent, after the final PPI-FG is made available by the Bureau of Labor Statistics in May of each calendar year.

The annual average PPI-FG index figure for 1993 was 124.7 and the annual average PPI-FG index figure for 1994 was 125.5.² The percent change expressed as a decimal) in the annual average PPI-FG from 1993 to 1994, minus one percent therefore is a negative .003585.³ Thus, oil pipelines must multiply their January 1-June 30, 1995 rate ceiling levels by .996415 to compute their rate ceiling levels for the period July 1, 1995, through June 30, 1996, in accordance with 18 CFR 342.3(d). If a resulting rate ceiling level is below a filed rate, that rate must be reduced in accordance with 18 CFR 342.3(e).

Secretary.
