Georgia Power Company, et al.; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Georgia Power Company, et al. (the licensee), to withdraw its March 14, 1995, application for proposed amendment to Facility Operating License No. NPF-5 for the Edwin I. Hatch Nuclear Plant, Unit No. 2, located in Applying County, Georgia.

The proposed amendment would have revised the primary containment isolation instrumentation action in the Technical Specifications to permit the drywell and wetwell purge valves, isolated by the drywell radiation monitor signal, to be opened with one inoperable drywell radiation monitor.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on March 29, 1995 (60 FR 16188). However, by letter dated May 1, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated March 14, 1995, and the licensee's letter dated May 1, 1995, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Applying County Public Library, 301 City Hall Drive, Baxley, Georgia 31513.
