picture badge identification system shall be used for all individuals who are authorized access to protected areas without escort." Paragraph (5) of 10 CFR 73.55(d) also states that an individual not employed by the licensee (i.e., contractors) may be authorized access to protected areas without escort provided the individual "receives a picture badge upon entrance into the protected area which must be returned upon exit from the protected area * * *."

Currently, employee and contractor combined identification badges/keycards are issued and retrieved on the occasion of each entry to and exit from the protected areas of the Beaver Valley Power Station site. Station security personnel are required to maintain control of the badges while the individuals are offsite. This practice has been in effect at the Beaver Valley Power Station since the operating license was issued. Security personnel retain each identification badge/keycard, when not in use by the authorized individual, within appropriately designed storage receptacles inside a bullet-resistance enclosure. An individual who meets the access authorization requirements is issued an individual picture identification card/keycard which allows entry into preauthorized areas of the station. While entering the plant in the present configuration, an authorized individual is "screened" by the required detection equipment and by the issuing security officer. Having received the badge/keycard, the individual proceeds to the access portal, inserts the badge/keycard into the card reader and passes through the turnstile which unlocks if the badge/keycard is valid.

This present procedure is labor intensive since security personnel are required to verify badge/keycard issuance, ensure badge/keycard retrieval, and maintain the badges/keycards in orderly storage until the next entry into the protected area. The regulations permit employees to remove their badges from the site, but an exemption from 10 CFR 73.55(d)(5) is required to permit contractors to take their badges offsite instead of returning them when exiting the site.

Environmental Impacts of the Proposed Action

Identification of the Proposed Action

The proposed action is in accordance with the licensee's application dated February 8, 1995, for exemption from certain requirements of 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage." The exemption would allow implementation of a hand geometry biometric system for site access control such that combined picture badges/keycards for certain non-employees can be taken offsite.

The Need for the Proposed Action

Pursuant to 10 CFR 73.55, paragraph (a), the licensee shall establish and maintain an onsite physical protection system and security organization.

Paragraph (1) of 10 CFR 73.55(d), "Access Requirements," specifies that "licensee shall control all points of personnel and vehicle access into a protected area." Paragraph (5) of 10 CFR 73.55(d) specifies that "A numbered

The Commission has completed its evaluation of the licensee's application. Under the proposed system, all individuals authorized to gain unescorted access will have the physical characteristics of their hand (hand geometry) recorded with their badge/keycard number. Since the hand geometry is unique to each individual
