BILLING CODE 4910-13-M

Federal Railroad Administration**Petition for Waivers of Compliance**

In accordance with 49 CFR 211.9, 211.41 and 211.45, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with certain requirements of the Federal safety laws and regulations. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested and the petitioner's arguments in favor of relief.

National Railroad Passenger Corporation (Amtrak)

Docket Number H-95-1

Amtrak requests waivers of compliance with certain provisions of the Federal Railroad Administration (FRA) railroad safety regulations. It is seeking relief from sections of Railroad Safety Appliance Standards (49 CFR Part 231), Railroad Safety Glazing Standards (49 CFR Part 223) and Railroad Track Safety Standards (49 CFR Part 213). The relief is being sought in order to demonstrate the IC3 "Flexiliner", a three-car, articulated, diesel hydraulic, multiple unit trainset built by ABB Scandia A/S for the Danish State Railway (DSB).

The demonstration is a joint project by Amtrak and ABB Traction, Inc. (ABB), and a number of potential sponsors, including state departments of transportation and commuter agencies. Amtrak is serving as the host agency and is acting as liaison with the FRA. The Flexiliner which will be demonstrated was built for the DSB and is presently in revenue service in Denmark. Modifications will be made to the equipment in Denmark to ensure the trainset meets Amtrak and FRA requirements, where practical.

Amtrak anticipates that the Flexiliner trainset will arrive at the Port of Baltimore in July 1995, and be taken to Washington, DC for commissioning tests. After completion of the tests, it is intended that the Flexiliner will operate across the country and be placed in revenue service in the Portland-Eugene, Oregon corridor. This is contingent upon ABB receiving a contract award from Oregon, following a competitive proposal evaluation. Demonstration runs in Amtrak's Northeast Corridor, at a maximum speed of 110 mph, may be scheduled for dignitaries before shipment to Oregon. The train may also operate in either demonstration service or revenue service between other city pairs in other parts of the country.
