

located at Drake Field, Fayetteville, AR, to provide controlled airspace for aircraft executing the MLS SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Airspace, Incorporation by reference, Navigation (air).

**Adoption of the Amendment**

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

**PART 71—[AMENDED]**

1. The authority citation for 14 CFR part 71 continues to read as follows:

**Authority:** 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

**§ 71.1 [Amended]**

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9B, *Airspace Designations and Reporting Points*, dated July 18, 1994, and effective September 16, 1994, is amended as follows:

*Paragraph 6004 Class E airspace areas designated as an extension to a Class D surface area*

\* \* \* \* \*

**ASW AR E4 Fayetteville, Drake Field, AK [New]**

Fayetteville, Drake Field, AK  
(Lat. 36°00'18" N., long. 94°10'12" W.)  
Fayetteville MLS  
(Lat. 35°59'59" N., long. 94°10'05" W.)

That airspace extending upward from the surface within 3 miles each side of the MLS 354° course inbound extending from the 4.1-mile radius of the airport to 12 miles south of the airport.

**[Airspace Docket No. 94–ASW–20]**

**Revision of Class E Airspace; Laredo, TX**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action revised the Class E airspace extending upward from 700 feet above ground level (AGL) at Laredo International Airport, Laredo, TX. The development of a revised standard instrument approach procedure (SIAP) to Runway (RWY) 14 has made this action necessary. Controlled airspace extending upward from 700 feet AGL is needed to contain aircraft executing the SIAP. This action is intended to provide adequate Class E airspace to contain instrument flight rule (IFR) operations for aircraft executing the Very High Frequency Omnidirectional Range/Distance Measuring Equipment (VOR/DME) or Tactical Air Navigation (TACAN) or Global Positioning System (GPS) SIAP to RWY 14 at Laredo International Airport, Laredo, TX.  
**EFFECTIVE DATE:** 0901 UTC, July 20, 1995.

**FOR FURTHER INFORMATION CONTACT:** Donald J. Day, System Management Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, Fort Worth, TX 76193–0530, telephone 817–222–5593.

**SUPPLEMENTARY INFORMATION:**

**History**

On December 16, 1994, a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise

the Class E airspace at Laredo, TX, was published in the **Federal Register** (59 FR 64880). A revised VOR/DME or TACAN or GPS RWY 14 SIAP developed for Laredo Municipal Airport, Laredo, TX, requires the revision of the Class E airspace at this airport. The proposal was to revise the controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments. However, the proposal was published with an incorrect bearing citation in the description of the airspace. The proposed description of Class E airspace referred incorrectly to the 189° bearing of the Laredo VORTAC. The correct bearing should have been the 181° bearing of the Laredo VORTAC. The description of the Class E airspace in this rule has been revised to reflect this change. The FAA has determined that this change is editorial in nature and will not increase the scope of this rule.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Except for the non-substantive change just discussed, the rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace designations for airspace areas extending upward from 700 feet or more AGL are published in Paragraph 6005 of the FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes the Class E airspace located at Laredo International Airport, Laredo, TX, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the VOR/DME or TACAN or GPS RWY 14 SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule”; under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as

the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

#### Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

#### PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

**Authority:** 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

##### § 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9B, *Airspace Designations and Reporting Points*, dated July 18, 1994, and effective September 16, 1994, is amended as follows:

*Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth*

\* \* \* \* \*

#### ASW TX E5 Laredo, TX [Revised]

Laredo International Airport, TX  
(Lat. 27°32'41" N, long. 99°27'41" W)

Laredo VORTAC  
(Lat. 27°28'44" N, long. 99°25'04" W)

Laredo, Rancho Blanco Airport, TX  
(Lat. 27°18'31" N, long. 99°28'53" W)

Laredo Auxiliary No. 2 Airport, TX  
(Lat. 27°28'33" N, long. 99°13'32" W)

That airspace extending upward from 700 feet above the surface within a 7.8-mile radius of Laredo International Airport and within 4.0 miles each side of the 328° bearing of the Laredo VORTAC extending from the 7.8-mile radius to 18.0 miles northwest of the Laredo VORTAC and within a 6.6-mile radius of Rancho Blanco Airport and within 1.6 miles each side of the 181° bearing of the Laredo VORTAC extending from the 6.6-mile radius to 12.1 miles north of the airport and within a 6.8-mile radius of Laredo Auxiliary No. 2 Airport excluding that airspace in Mexico.

[Airspace Docket No. 94–ASW–16]

#### Establishment of Class E Airspace; Ozona, TX

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action establishes Class E airspace extending upward from 700 feet above ground level (AGL) at Ozona Municipal Airport, Ozona, TX. The development of a Global Positioning System (GPS) standard instrument approach procedure (SIAP) to Runway (RWY) 16 has made this action necessary. Controlled airspace extending upward from 700 feet above ground level (AGL) is needed to contain aircraft executing the SIAP. This action is intended to provide adequate Class E airspace to contain instrument flight rule (IFR) operations for aircraft executing the SIAP at Ozona Municipal Airport, Ozona, TX.

**EFFECTIVE DATE:** 0901 UTC, July 20, 1995.

**FOR FURTHER INFORMATION CONTACT:** Donald J. Day, System Management Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, Forth Worth, TX 76193–0530, telephone 817–222–5593.

#### SUPPLEMENTARY INFORMATION:

##### History

On December 5, 1994, a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish the Class E airspace at Ozona, TX, was published in the **Federal Register** (59 FR 62364). A GPS SIAP developed for Ozona Municipal Airport, Ozona, TX, requires Class E airspace. The proposal was to revise the controlled airspace extending upward from 700 feet AGL to contain IFR operations in controlled airspace during portions of the terminal operation and while transitioning between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Therefore, the rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace designations for airspace areas extending upward from 700 feet or more AGL are published in Paragraph 6005 of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

#### The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes the Class E airspace located at Ozona Municipal Airport, Ozona, TX, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing the GPS RWY 16 SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

#### Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

#### PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

**Authority:** 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

##### § 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9B, *Airspace Designations and Reporting Points*, dated July 18, 1994, and effective September 16, 1994, is amended as follows:
