FOR FURTHER INFORMATION CONTACT: Robert S. Cunningham or Peter R. Karasik at the above address or (703) 306-1031.

SUPPLEMENTARY INFORMATION: NSF's Antarctic Waste Regulation, 45 CFR Part 671, requires all U.S. citizens and entities to obtain a permit for the use or release of banned substances or designated pollutants in Antarctica, and for the release of waste in Antarctica. NSF has received a permit application under this Regulation which covers materials and waste management associated with two planned expeditions per year by the *Pelagic*, which accommodates a total of eight people on board, for camping and climbing activities along the Antarctic peninsula. The permit applicant is: Mr. Skip Novak, PELAGIC, 92 Stachell Lane, Hamble, Hampshire, S031 4HL ENGLAND. The proposed duration of the permit is from December 27, 1995 through December 26, 2000.

Activity for Which Permit Requested

The PELAGIC is planned to make two 35-day trips per year to the Antarctic Peninsula. Passengers will be making one to two day outings on shore at various landing locations and will be using gasoline or kerosene in camping stoves during camping and climbing trips. All garbage including food wastes, plastics, tins, and bottles will be packed out of Antarctica and returned to South America on the ship. Conditions of the permit will include requirements to avoid Antarctic Specially Protected Areas (SPAs) and Sites of Special Scientific Interest (SSSIs), educate

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-424 and 50-425]

Georgia Power Company, et al; Vogtle Electric Generating Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from certain requirements of its regulations to Facility Operating License Nos. NPF-68 and NPF-84, issued to Georgia Power Company, et al. (the licensee) for operation of the Vogtle Electric Generating Plant (Vogtle), Units 1 and 2, located at the licensee's site in Burke County, Georgia.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant an exemption from certain requirements of 10 CFR 50.60, "Acceptance Criteria for Fracture Prevention Measures for Light-Water Nuclear Power Reactors for Normal Operation," to allow application of an alternate methodology to determine the low temperature overpressure protection (LTOP) setpoint for Vogtle. The proposed alternate methodology is consistent with guidelines developed by the American Society of Mechanical Engineers (ASME) Working Group on Operating Plant Criteria (WGOPC) to define pressure limits during LTOP events that avoid certain unnecessary operational restrictions, provide adequate margins against failure of the reactor pressure vessel, and reduce the potential for unnecessary activation of pressure-relieving devices used for LTOP. These guidelines have been incorporated into Code Case N-514, "Low Temperature Overpressure Protection," that has been approved by the ASME Code Committee. The content of this Code case has been incorporated into Appendix G of Section XI of the ASME Code and published in the 1993 Addenda to Section XI. The NRC staff is revising 10 CFR 50.55a that will
