The following proposed information collections have been submitted to OMB:

1. *Statistical research in archival records containing personal information.*

Description: The information collection, which is contained in 36 CFR 1256.4, is a written request for access to archival records that are restricted because they contain highly personal information. The access must be for the purpose of conducting biomedical research.

Purpose: The information is used to evaluate whether the research proposal meets the conditions imposed by NARA on access to restricted archival records containing highly personal information. Frequency of response: On occasion. Number of respondents: 1. Reporting hours per response: 7. Annual reporting burden hours: 7.

2. *NARA Class Evaluation Forms (NA Forms 2019A, 2019B, 2019C, and 2019D).*

Description: The information collection is an evaluation form completed by participants in training courses and workshops that NARA conducts on archival and records management topics and on use of the **Federal Register**. The version of the form used depends on the length and format of a class.

Purpose: The information collection will help NARA to assess customer satisfaction with the course content and delivery, and to correct problems with classes to ensure that future classes meet the customers' needs.

Frequency of response: On occasion. Number of respondents: 4,850.

Reporting hours per response: 5 minutes for NA Forms 2019A, 2019B, and 2019C, which are used in most classes. 10 minutes for NA Form 2019D, which is used for certain multi-day classes.

Annual reporting burden hours: 509 hours.

3. *Application and Permit for Use of Space in Presidential Library and Grounds (NA Form 16011).*

Description: The information collection is an application form completed by organizations that want to hold meetings or other activities at a Presidential Library. When approved, the form also serves as the permit for the activity.

Purpose: The information is used to determine whether the proposed use will meet the criteria specified in 36 CFR 1280.42 and to schedule the dates.

Frequency of response: On occasion. Most respondents request use of the library space for a specific one-time event.

Number of respondents: 1,000.

Reporting hours per response: 20 minutes.

Annual reporting burden hours: 334 hours.

Dated: May 23, 1995.

NUCLEAR REGULATORY COMMISSION

All Licensees; Issuance of Director's Decision Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Enforcement, has issued a decision concerning the Petition filed by Mr. Thomas J. Saporito, Jr., (Petitioner) on March 8, 1995. The Petition requested that the NRC issue a generic letter of instruction to all licensees requiring them to review their station operating procedures to determine whether those procedures include any restrictions that would prevent or dissuade a licensee employee from bringing perceived safety concerns directly to the NRC without following the normal chain of command. The Petition requests that each licensee be required to report to the Commission, under oath or affirmation, that the review has been completed, that its employees are free to bring concerns to the NRC without following the normal chain of command, and that this information has been communicated to all of its employees.

Based on a review of Petitioner's request and the Secretary of Labor's Decision and Remand Order of June 3, 1994 and Order of February 16, 1995, the Director, Office of Enforcement, has denied this Petition. The reasons for the denial are explained in the "Director's Decision under 10 CFR 2.206" (DD-95-08) which is available for public inspection in the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555.

A copy of this Decision will be filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206. As provided by this regulation, the Decision will constitute the final action of the Commission 25 days after the date of issuance of the Decision unless the Commission on its own motion institutes a review of the Decision within that time.

Dated at Rockville, Maryland this 25th day of May 1995.

For the Nuclear Regulatory Commission.

James Lieberman,

Director, Office of Enforcement.

[Docket No. 50-606]

Arkansas Tech University; Notice of Withdrawal of Application for Construction Permit and Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Arkansas Tech University (the applicant) to withdraw its November 13, 1989, application for issuance of a construction permit and subsequently a facility operating license for a non-power reactor for educational, training, and research purposes on the campus of the applicant in Russellville, Arkansas.

The Commission had previously issued a Notice of Proposed Issuance of Construction Permit and Facility Operating License published in the **Federal Register** on November 13, 1990 (55 FR 47408). However, by letter dated April 10, 1995, the applicant withdrew the application.

For further details with respect to this action, see the application for construction permit and facility operating license dated November 13, 1989, and the letter from the applicant dated April 10, 1995, which withdrew the application. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.
