Title: Reporting and Recordkeeping Requirements for the New Source Performance Standards, (NSPS) Subpart QQ for the Graphics Arts Industry—Publication Rotogravure Printing (ICR No. 0657.05; OMB No. 2060-0105).

Abstract: This ICR is for an extension of an existing information collection in support of the Clean Air Act, as described under the general NSPS at 40 CFR 60.7-60.8 and the specific NSPS, for volatile organic compound (VOC) emissions from the Graphic Arts Industry, at 40 CFR 60.430-60.435. The information will be used by EPA to

direct monitoring, inspection, and enforcement efforts, thereby ensuring compliance with the NSPS.

Owners and operators of affected facilities must provide EPA with: (1) Notification of construction, reconstruction, or modification; (2) anticipated and actual dates of facility startup; (3) initial performance test data, date and results; and (4) notification of any physical or operational change to an existing facility which could increase the VOC emission rate.

All affected facilities must maintain records on the facility operation that document: (1) Occurrence and duration of any start-ups, shutdowns, and malfunction; (2) amount of volatile solvent used and the amount recovered; (3) percentage of volatile solvent emitted over each performance period (4 weeks or one month); (4) amount of water used; (5) periods when the monitoring system was inoperative and (6) initial performance test results.

Presently there are approximately 165 sources at 17 respondent facilities, subject to the regulation. All subject facilities must maintain records related to compliance for two years.

Burden Statement: Public reporting burden for facilities subject to this collection of information is estimated to average 328 hours annually.

Respondents: Owners or operators of subject rotogravure printing facilities which commenced construction, reconstruction, or modification after October 28, 1980.

Estimated Number of Respondents: 17.

Estimated Number of Respondents per Respondent: 1.

Estimated Total Annual Burden on Respondents: 5577 hours.

Frequency of Collection: One-time notifications for new facilities; occasional reporting, as appropriate, for existing facilities.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, (please refer to EPA ICR #657.04 and OMB #2060-0105) to:

Title: Application for Motor Vehicle Emission Certification and Fuel Economy Labeling (EPA ICR #783.33; OMB #2060-0104). This ICR requests renewal of an existing clearance.

Abstract: Motor vehicle and motor vehicle engine manufacturers maintain records and submit detailed reports to EPA describing their planned product line with a description of emission control systems, and test data organized by "engine family" groups expected to have similar emissions and "model types" with similar fuel economy. Manufacturers must maintain records on information submitted to EPA. The EPA, the IRS and the DOT use the information to verify compliance with the Clean Air Act, gas guzzler taxes in the Omnibus Reconciliation Act, 1990, and Corporate Average Fuel Economy Standards respectively. State and local governments also use the information in their inspection/maintenance programs. More specifically, the EPA uses the information to issue certificates of conformity and fuel economy labels, to determine that manufacturers conducted appropriate tests and verify that vehicles comply with prescribed emission standards.

Burden Statement: The public reporting burden for this collection of information is estimated to average
