Notice of Lodging of Amendment To Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, and 42 U.S.C. 9622(d)(2), notice is hereby given that a proposed amendment to the consent decree in *United States v. GATX Corporation and General American Transportation Corporation*, Civil Action No. 94-312E, was lodged on June 1, 1995 with the United States District Court for the Western District of Pennsylvania. The original Consent Decree requires the defendants to excavate and incinerate contaminated soils and sludges at the Site at the Saegertown Industrial Area Site in Saegertown, Crawford County, Pennsylvania. The Consent Decree also requires the defendants to pay a portion of the United States past and future costs associated with the Site. Further, the consent decree requires the defendants to reimburse the United States for damages caused to the natural resources within the trusteeship of the U.S. Fish and Wildlife Service.

The proposed amendment to the Consent Decree modifies the clean up that the defendants must perform. Instead of on-site incineration, the proposed amendment would require transportation of the sludges and soils to an off-site cement kiln, where the materials will be used as an alternative fuel.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. GATX Corporation and General American Transportation Corporation*, DOJ Ref. #90-11-2-870.

The proposed consent decree may be examined at the office of the United States Attorney, 633 Post Office & Courthouse, 7th & Grant Streets, Pittsburgh, PA 15219; the Region III Office of the Environmental Protection

Agency, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624-0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of \$44.55 (25 cents per page reproduction costs), payable to the Consent Decree Library.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-458]

Entergy Operations, Inc. Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-47, issued to Entergy Operations, Inc. (the licensee), for operation of the River Bend Station, Unit 1 (RBS), located in West Feliciana Parish, Louisiana.

Environmental Assessment

Identification of the Proposed Action

The proposed amendment will replace the existing Technical Specifications (TSs) in their entirety with the Improved Technical Specifications (ITSS).

The proposed action is in accordance with the licensee's amendment request dated November 30, 1993, as supplemented January 18, 1995.

The Need for the Proposed Action

It has been recognized that nuclear safety in all plants would benefit from improvement and standardization of the TSs. The "NRC Interim Policy Statement on Technical Specification Improvements for Nuclear Power Reactors," (**Federal Register** 52 FR 3788, February 6, 1987) and later the Final Policy Statement, formalized this need. To facilitate the development of individual ITSS, each reactor vendor owners group (OG) and the NRC staff developed Standard TSs. For General Electric (GE) plants, the Standard TSs (STS) are NUREG-1433 for BWR/4 reactor facilities and NUREG-1434 for BWR/6 facilities. NUREG-1434 formed the basis of the RBS ITSS.

Description of the Proposed Change

The proposed revision to the TSs is based on NUREG-1434 and on guidance provided in the Policy Statement. Its objective is to completely rewrite, reformat, and streamline the existing TSs. Emphasis is placed on human factors principles to improve clarity and understanding. The Bases section has been significantly expanded to clarify and better explain the purpose and foundation of each specification. In addition to NUREG-1434, portions of the existing TSs were also used as the basis for the ITSS. Plant-specific issues (unique design features, requirements, and operating practices) were discussed at length with the licensee, and generic matters with GE and other OGs.
