NUCLEAR REGULATORY COMMISSION

[Docket No. 50-458]

Entergy Operations, Inc. Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-47, issued to Entergy Operations, Inc. (the licensee), for operation of the River Bend Station, Unit 1 (RBS), located in West Feliciana Parish, Louisiana.

Environmental Assessment

Identification of the Proposed Action

The proposed amendment will replace the existing Technical Specifications (TSs) in their entirety with the Improved Technical Specifications (ITSS).

The proposed action is in accordance with the licensee's amendment request dated November 30, 1993, as supplemented January 18, 1995.

The Need for the Proposed Action

It has been recognized that nuclear safety in all plants would benefit from improvement and standardization of the TSs. The "NRC Interim Policy Statement on Technical Specification Improvements for Nuclear Power Reactors," (**Federal Register** 52 FR 3788, February 6, 1987) and later the Final Policy Statement, formalized this need. To facilitate the development of individual ITSS, each reactor vendor owners group (OG) and the NRC staff developed Standard TSs. For General Electric (GE) plants, the Standard TSs (STS) are NUREG-1433 for BWR/4 reactor facilities and NUREG-1434 for BWR/6 facilities. NUREG-1434 formed the basis of the RBS ITSS.

Description of the Proposed Change

The proposed revision to the TSs is based on NUREG-1434 and on guidance provided in the Policy Statement. Its objective is to completely rewrite, reformat, and streamline the existing TSs. Emphasis is placed on human factors principles to improve clarity and understanding. The Bases section has been significantly expanded to clarify and better explain the purpose and foundation of each specification. In addition to NUREG-1434, portions of the existing TSs were also used as the basis for the ITSS. Plant-specific issues (unique design features, requirements, and operating practices) were discussed at length with the licensee, and generic matters with GE and other OGs.
