Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision, San Joaquin Valley Unified Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is finalizing the approval of revisions to the California State Implementation Plan (SIP) proposed in the **Federal Register** on January 9, 1995. The revisions concern rules from the following district: San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD). This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of volatile organic compounds (VOCs) in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). The revised rules control VOC emissions from polystyrene foam, polyethylene, and polypropylene manufacturing and polyester resin operations. Thus, EPA is finalizing the approval of these revisions into the California SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

EFFECTIVE DATE: This action is effective on July 13, 1995.

ADDRESSES: Copies of the rule revisions and EPA's evaluation report for each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rule revisions are available for inspection at the following locations:

SUPPLEMENTARY INFORMATION:

Background

On January 9, 1995 in 60 FR 2367, EPA proposed to approve the following rules into the California SIP: SJVUAPCD's Rule 4682, Polystyrene Foam, Polyethylene, and Polypropylene Manufacturing; and SJVUAPCD's Rule 4684, Polyester Resin Operations. Rule 4682 was adopted by SJVUAPCD on June 16, 1994 and Rule 4684 was adopted by SJVUAPCD on May 19, 1994. Both rules were submitted by the California Air Resources Board (CARB) to EPA on July 13, 1994. These rules were submitted in response to EPA's 1988 SIP-Call and the CAA sections 182(b)(2) (B) and (C) requirements that nonattainment areas submit reasonably available control technology (RACT) rules for all major sources of VOCs by November 15, 1992 (the RACT catch-up requirements). A detailed discussion of the background for each of the above rules and nonattainment area is provided in the NPRM cited above.

EPA has evaluated all of the above rules for consistency with the requirements of the CAA and EPA regulations and EPA interpretation of these requirements as expressed in the various EPA policy guidance documents referenced in the NPRM cited above. EPA has found that the rules meet the applicable EPA requirements. A detailed discussion of the rule provisions and evaluations has been provided in 60 FR 2367 and in technical support documents (TSDs) available at EPA's Region IX office (TSDs dated August 8, 1994—Rule 4682 and August 3, 1994—Rule 4684).

Response to Public Comments

A 30-day public comment period was provided in 60 FR 2367. No comments were received.

EPA Action

EPA is finalizing action to approve the above rules for inclusion into the California SIP. EPA is approving the submittal under section 110(k)(3) as

meeting the requirements of section 110(a) and Part D of the CAA. This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of VOCs in accordance with the requirements of the CAA.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

The OMB has exempted this action from review under Executive Order 12866.
