Title: National Pollutant Discharge Elimination System (NPDES) Modification and Variance Requests. (OMB Control No. 2040-0068; EPA ICR No. 0029.06). This is a request for extension of a currently approved information collection.

Abstract: NPDES permittees must notify EPA or the State regulatory agency of events which may render permit conditions or limitations inappropriate. NPDES permits contain limits on the amount of pollutants that facilities may discharge and impose other conditions on dischargers to comply with Clean Water Act requirements. An applicant for a modification or variance must submit information so that the permitting

authority can assess whether the facility is eligible for a variance and whether a deviation from Clean Water Act provisions is necessary.

Burden Statement: The public reporting burden for this collection of information is estimated to total 40,122 hours annually for NPDES permittees, or approximately 5 hours per respondent. The total annual burden projected includes 77,398 hours estimated as burden to State governments delegated NPDES regulatory authority. These estimates include the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete and review the collection of information.

Respondents: NPDES permittees.

Estimated No. of Respondents: 8,753.

Estimated Total Annual Burden: 117,520 hours.

Frequency of Collection: On occasion.
