BILLING CODE 4160-18-M

**ACTION:** Notice of extension of the public comment period.

**SUMMARY:** The Fish and Wildlife Service (Service) gives notice that the public comment period on the environmental assessment/habitat conservation plan for the Aronov Realty and Management Incorporated (Applicant) application for an incidental take permit pursuant to Section 10(a) of the Endangered Species Act (Act) is being extended. The Applicant has been assigned permit number PRT-802986. The original 30-day comment period was to end on June 30, 1995 (**Federal Register** 60:28428). In the intervening period, the Applicant has proposed certain additional mitigation and minimization measures to fully address the potential impacts to the Bon Secour National Wildlife Refuge and the endangered Alabama Beach mouse (ABM).

**DATES:** The public comment period for this proposal, which originally closed on June 30, 1995, is now extended until July 14, 1995.

**ADDRESSES:** Persons wishing to review the application, Environmental Assessment, or Habitat Conservation Plan may obtain a copy by writing the Service's Southeast Regional Office, Atlanta, Georgia. Documents will also be available for public inspection, by appointment, during normal business hours at the Regional Office, or the field office. Written data or comments concerning the application, Environmental Assessment, or Habitat Conservation Plan should be submitted to the Regional Office. Please reference permit under **PRT-802986** in such comments.

Regional Permit Coordinator (TE), U.S. Fish and Wildlife Service, 1875 Century Boulevard, Suite 210, Atlanta, Georgia 30345, (telephone 404/679-7110, fax 404/679-7280).

Field Supervisor, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Suite A, Jackson, Mississippi 39213 (telephone 601/965-4900, fax 601/965-4340).

**FOR FURTHER INFORMATION CONTACT:** Rick G. Gooch at the Atlanta, Georgia, Regional Office.

**SUPPLEMENTARY INFORMATION:** The ABM, *Peromyscus polionotus ammobates*, is a subspecies of the common oldfield mouse *Peromyscus polionotus* and is restricted to the dune systems of the Gulf Coast of Alabama. The known current range of ABM extends from Fort Morgan eastward to the western terminus of Alabama Highway 182, including the Perdue Unit on the Bon Secour National Wildlife Refuge (BSNWR). The sand dune systems

#### Extension of the Public Comment Period—Availability of an Environmental Assessment and Receipt of an Application for an Incidental Take Permit From Aronov Realty and Management Inc., in Baldwin County, AL

**AGENCY:** Fish and Wildlife Service, Interior.

inhabited by this species are not uniform; several habitat types are distinguishable. The species inhabits primary dunes, interdune areas, secondary dunes, and scrub dunes. The depth and area of these habitats from the beach inland varies. Population surveys indicate that this subspecies is usually more abundant in primary dunes than in secondary dunes, and usually more abundant in secondary dunes than in scrub dunes. Optimal habitat consists of dune systems with all dune types. Though fewer ABM inhabit scrub dunes, these high dunes can serve as refugia during devastating hurricanes that overwash, flood, and destroy or alter secondary and frontal dunes. ABM surveys on the Applicant's property reveal habitat occupied by ABM. The Applicant's property contains designated critical habitat for the ABM. Construction of the project may result in the death of, or injury to, ABM. Habitat alterations due to house placement and its subsequent use may reduce available habitat for food, shelter, and reproduction. Further, the Applicant's property borders the BSNWR, and is considered Priority I lands for inclusion into the Perdue Unit (of BSNWR).

The Environmental Assessment considers the environmental consequences of several alternatives. One action proposed is the issuance of the incidental take permit. This alternative provides for restrictions that include placing landward of the designated ABM critical habitat, establishment of a walkover structure across that scrub dune, a prohibition against housing or keeping pet cats, ABM competitor control and monitoring measures, scavenger-proof garbage containers, restoration of dune systems impacted by the construction, creation of a mitigation endowment for offsite acquisition of suitable ABM habitat, and the minimization and control of outdoor lighting. The Habitat Conservation Plan provides a funding source for these mitigation measures. Another alternative is Service acquisition of the property for inclusion into the BSNWR. A third alternative is no-action, or deny the request for authorization to incidentally take the ABM.

Dated: June 13, 1995.
