

imperceptible to the human eye. The average performance value for zone 3 for all 17 tested lamps is 10 percent below the 2375 cd federal requirement, and every lamp fell within 20 percent of that requirement (ranging from -1% to -18% of the requirement). As acknowledged in NHTSA's notices granting other similar petitions for determination of inconsequential noncompliance, and as demonstrated in the recent study (DOT HS 808 209, Final Report dated September 1994) sponsored by the agency *Driver Perception of Just Noticeable Difference in Signal Lamp Intensities*, a change in luminous intensity of approximately 25 percent is required before the human eye can detect a difference between the two lamps. (See, e.g., Notice granting petition by Subaru of America (56 Fed. Reg. 59971); and Notice granting petition by Hella, Inc. (55 Fed. Reg. 37602).) Since the average discrepancy for the Buick lamp is only 10% with a maximum measured discrepancy of 18%, the subject lamps do not compromise motor vehicle safety as the noncompliance is not detectable by the human eye.

The subject lamps otherwise meet or exceed all other requirements of FMVSS 108, including the requirement of SAE J588, November 1984, that "the measured values at each test point shall not be less than 60% of the minimum value in Table 3 [Photometric Design Guidelines]."

GM is not aware of any accidents, injuries, owner complaints or field reports related to this condition.

Interested persons are invited to submit written data, views, and arguments on the application of GM described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date, will also be filed and will be considered to the extent possible. When the application is granted or denied, the notice will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: July 21, 1995.
