

At its first meeting, the Technical Committee on Rules of Origin (TCRO) invited comments on the subject of minimal processing operations that are considered not to confer origin. The United States administration accordingly submits the following comments and proposal.

While there are numerous operations that, in specific instances, will not confer origin, there are only a few operations that never or almost never effect a substantial transformation. Consequently, only a limited number of minimal processing operations should be recognized in a general rule as not conferring origin. Although for any specific product certain processes ought not to confer origin, it is the view of the U.S. administration that such situations are best addressed by tariff shift rules that do not recognize particular processes as origin-conferring for a specific product.

The rule should apply to negate only the operation of the tariff shift rules. The rule would operate to preclude conferring origin only when an origin-conferring change in tariff classification is accomplished solely by means of one or more of the listed processing operations. The rule would not operate to preclude conferring origin on goods if the change in tariff classification occurred as a result of other operations, even though one or more of the "minimal processing" operations occurred as well.

The rule should not affect the definition of wholly obtained goods or apply to any supplementary rules, even when those goods undergo such listed operations. The U.S. administration believes the following ought to be included in this enumeration:

Change in tariff classification resulting solely from a change in the use of the article;

Simple packing or packaging for retail sale;

Mere dilution with water or another substance that does not alter the essential character of the good; and

Dismantling or disassembly in order to facilitate transportation.

The U.S. administration wishes to emphasize that the appropriate content of this enumeration depends heavily on the nature and effect of the tariff shift rules yet to be considered. As a result, this issue should be reconsidered after the tariff shift rules have been completed.

[Investigation No. 337-TA-371]

Order No. 39: Order Designating Investigation "More Complicated"

In the Matter of Certain Memory Devices With Increased Capacitance and Products Containing Same.

Rule 210.22(b) of the Commission's final rules published August 30, 1994 (59 FR 39020), permits the administrative law judge to issue sua sponte an order designating an investigation "more complicated" in order to have up to six months of additional time to adjudicate a complainant's request for permanent

relief under Section 337 of the Tariff Act.

In a telephone conference attended by counsel for all parties on June 6, 1995, I advised the parties that I would designate this investigation "more complicated" and set the hearing to commence September 18, 1995. The parties agreed to the September 18 hearing date. The reason for the more complicated designation is the unexpected reassignment of the investigation to me on June 2, 1995, and the need to fit it in with my existing docket.

Accordingly, it is hereby ordered that this investigation be designated "more complicated". A revised procedural schedule will be issued separately. The Secretary is requested to publish this order in the **Federal Register**.

Issued: June 9, 1995.

Sidney Harris,

Administrative Law Judge.
