

for Property Loss Reduction (IIPLR) and other insurance trade associations to cooperatively address the wildland/urban interface issue. Attention should be given to:

- Recommendations for including hazards and risks associated with the wildland/urban interface into the fire protection grading system of the Insurance Service Office (ISO).

- Recommendations on a strategy to promote an awareness of wildland/urban interface issues, highlighting insurance industry/policyholder/homeowner success stories.

- Proposals to strengthen Southern Standard Building Code, Uniform Building Code, and National Building Code provisions for structures built in the wildland/urban interface.

—Development of model mutual-aid agreements among Federal fire agencies, the International Association of Fire Chiefs, National Association of State Foresters, and local/regional agencies, addressing local and regional mitigation and suppression requirements in the wildland/urban interface.

—Establishment of a monitoring plan that includes yearly reporting requirements for the Federal agencies and States and establishment of pilot areas as a tool to test and model policy and program changes within the wildland/urban interface.

- The WGA report will independently develop recommendations and an action plan, based on input and consensus, proposing resolution of problems within the wildland/urban interface.

- While the WGA will conduct the assessment in cooperation with the Federal government, WGA will remain an independent contributor to the broader Federal Wildland Fire Policy and Program Review. This will ensure that the various State, local and private interests can fully express their views and not feel compromised through a Federal process.
