NATIONAL LABOR RELATIONS BOARD

29 CFR Parts 100 and 102

Miscellaneous Amendments

AGENCY: National Labor Relations Board (NLRB).

ACTION: Miscellaneous amendment rule.

SUMMARY: The National Labor Relations Board is issuing a miscellaneous amendments rule to its administrative regulations to update cross-references and to change the NLRB's headquarters address.

EFFECTIVE DATE: The miscellaneous amendments are effective June 23, 1995.

FOR FURTHER INFORMATION CONTACT: Gloria Joseph, Director of Administration, National Labor Relations Board, Room 7108, 1099 14th Street NW, Washington, DC 20570-0001. (202-273-3890).

SUPPLEMENTARY INFORMATION: On July 21, 1994, the National Labor Relations Board amended its administrative regulations (59 FR 37157) governing the standards of conduct and financial disclosure requirements of its employees of the Agency. Most of those regulations had been superseded by the Standards of Ethical Conduct for Employees of the Executive Branch issued by the Office of Government (OGE). The NLRB published the rule to repeal those portions of the provisions that were superseded by the executive branch-wide standards and to update cross-references in the current regulations that continued to be applicable. Again, on May 5, 1995, the NLRB published a rule to correct amendatory instructions 4, and 5, and amendatory instruction 10. (59 FR 37158) of the July 21, 1994 amending rule (60 FR 22269). This miscellaneous amendments rule is being published to update cross-references, and change the NLRB's headquarters address in some sections from its former address of 1717 Pennsylvania Avenue NW to its current address of 1099 14th Street NW.

National Emission Standards for Hazardous Air Pollutants From Secondary Lead Smelting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action promulgates national emission standards for hazardous air pollutants (NESHAP) for new and existing secondary lead smelters pursuant to section 112 of the Clean Air Act (the Act) as amended in 1990. Secondary lead smelters have been identified by the EPA as significant emitters of several chemicals identified in the Act as hazardous air pollutants (HAP's) including but not limited to lead compounds, arsenic compounds, and 1,3-butadiene. Chronic exposure to arsenic and 1,3-butadiene is associated with skin, bladder, liver and lung cancer and other developmental and reproductive effects. Exposure to lead compounds results in adverse effects on the blood, central nervous system and kidneys. Children are particularly sensitive and exposure to lead compounds can also result in reduced cognitive development and reduced growth. This rulemaking will affect secondary lead smelters that use blast, reverberatory, rotary, or electric smelting furnaces to recover lead metal from scrap lead, primarily from used lead-acid automotive-type batteries. The purpose of the final rule is to reduce HAP emissions from secondary lead smelting. This rule is estimated to reduce emissions, including metal HAP's and organic HAP's, by about 1,300 megagrams (1,400 tons) per year.
