

facility and stated that she was not credited for inventory that had to be destroyed. Ms. Reece stated that her starting inventory was substantially less than it should have been and that she did not receive an inventory report from the SLA until one year later. Complainant also stated that there was a problem with theft. She testified that these circumstances contributed to her inability to generate a profit. The Division of Family Services stated that it attempted to assist the complainant in improving the operation of her facility by making personnel available to assist in correcting her problems. The SLA provided an electric cash register to help her maintain better records of her cash flow.

Ms. Reece sought the reinstatement of her license, lost earnings in the amount of \$8,000, as well as reimbursement of attorney's fees. Complainant also sought to be reinstated at vending facility no. 84 at the Federal Court and Customs House. Complainant believed that, since the facility had been renovated and a security camera had been installed, she could operate the facility within the cost guidelines established by the SLA.

Arbitration Panel Decision

The panel found that Ms. Reece did not, in the 10 years that she operated the vending facility, achieve the set guidelines of 72% of net sales for the cost of goods to be sold and the 19% profit margin as required under 13 CSR 40-91.010(11). Her cost of goods to be sold exceeded 103% on several occasions and averaged in the 90 percent range. Her profit margin was never more than 5% or 6%, but most of the time that profit margin was less than 1% or a negative profit.

There was evidence that the SLA attempted to assist the vendor on several occasions in cutting her cost of goods sold and improving her margin of profit. The panel found that the SLA had just cause to terminate Ms. Reece's vendor's license. The panel suggested to the SLA that the vendor be permitted to apply for rehabilitation services and, upon completion of those services, that her bid be considered on a Level I facility when it becomes available.

The views and opinions expressed by the panel do not necessarily represent the views and opinions of the U. S. Department of Education.

Dated: June 13, 1995.

Judith E. Heumann,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Financial Assistance: County of Lake, Special Districts Administration, Lakeport, CA

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of intent.

SUMMARY: The U.S. Department of Energy, Idaho Operations Office, announces that pursuant to the DOE Financial Assistance Rules 10 CFR 600.7, it intends to award a renewal for Grant Number DE-FG07-93HD13257 to the County of Lake, Lakeport, California. The objective of the work to be performed under this grant is to provide funds to continue design, engineering, and construction oversight activities on the Southwest Geysers Effluent Pipeline. The project plan is to use treated wastewater effluent for injection as a means of increasing the recovery of energy from The Geysers geothermal field. The Federal Domestic Catalog Number is 81.087.

FOR FURTHER INFORMATION CONTACT:

Kathleen M. Stallman, U.S. Department of Energy, Idaho Operations Office, 850 Energy Drive, MS 1221, Idaho Falls, Idaho 83401-1563, (208) 526-7038.

SUPPLEMENTARY INFORMATION: The statutory authority for the proposed award is the Geothermal Energy Research, Development & Demonstration Act (Pub. L. 93-410); the Department of Energy Organization Act (Pub. L. 95-91); and the Energy and Water Development Appropriation Bill of 1993 (Pub. L. 102-377). The proposal meets the criteria for "non-competitive" financial assistance as set forth in 10 CFR Part 600.7(b)(2)(i)(C). The applicant represents a unit of government and the activity to be supported is related to the performance of a government function within the subject jurisdiction. The County of Lake is the leader of this project and is the appropriate agency, since they will be the owner and operator of the pipeline carrying the effluent from the county wastewater treatment plant to The Geysers. The anticipated period to complete the award is eighteen (18) months. The Office of Utility Technologies has provided \$1,800,000 to the DOE, Idaho Operations Office for support of this project. This grant would augment the County's funds associated with this project. The total estimated cost of this project is \$30,000,000.

R. Jeffrey Hoyles,

Director, Procurement Services Division.

BILLING CODE 6450-01-M

Refractory Containment Research, Development and Demonstration

AGENCY: Department of Energy, Idaho Operations Office.

ACTION: Solicitation for Financial Assistance: Refractory Containment Research, Development and Demonstration.

SUMMARY: The U.S. Department of Energy (DOE) Idaho Operations Office (ID), is seeking applications for cost-shared research, development and demonstration (field testing) of new refractories in state-of-the-art high temperature furnaces and molten material handling equipment to assist end-use industry sectors to remain competitive, and reduce energy consumption and environmental impacts. The research is to be directed toward those refractories used by the aluminum, glass, iron or steel industries. Applications shall include a demonstration (field test) in an end-use facility. A minimum 50% non-DOE cost-share is required. This is the complete solicitation document.

DATES: The deadline for receipt of applications is 4:00 p.m. MDT, August 17, 1995.

ADDRESSES: Applications shall be submitted to: B. G. Bauer, Contracting Officer; Procurement Services Division; U. S. Department of Energy; Idaho Operations Office; P.O. Box 52280; Idaho Falls, Idaho 83405-2280. [NUMBER DE-PS07-95ID13375]

SUPPLEMENTARY INFORMATION:

A. Background

Projects sponsored by the DOE Office of Industrial Technologies (OIT) are based on the needs and concerns of industry. The program advances technology to the point of commercialization. Historically, activities have focused on industrial competitiveness, the development of energy efficient, environmentally benign technology and equipment. As part of this program, this solicitation for DOE financial assistance applications is being issued. This solicitation is in accordance with Public Law 93-577, the Federal Non-nuclear Energy Research and Development Act of 1974.

B. Project Description

DOE anticipates awarding one or more Cooperative Agreements in accordance with DOE Financial Assistance regulations appearing at Title
