

Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

In accordance with § 672.20(c)(1)(ii)(B), the annual TAC for POP in the Western Regulatory Area was established by the final 1995 harvest specifications of groundfish (60 FR 8470, February 14, 1995) as 1,014 metric tons (mt). At the same time, the directed fishery for POP in the Western Regulatory Area was closed under § 672.20(c)(2)(ii) in order to reserve amounts anticipated to be needed for incidental catch in other fisheries (60 FR 8470, February 14, 1995). NMFS has determined that as of June 3, 1995, 995 mt remain unharvested.

The Director, Alaska Region, NMFS, has determined that the 1995 TAC for POP in the Western Regulatory Area has not been reached. Therefore, NMFS is terminating the previous closure and is opening directed fishing for POP in the Western Regulatory Area.

All other closures remain in full force and effect.
