

DEPARTMENT OF ENERGY**Privacy Act of 1974; Amendment of Existing Systems of Records**

AGENCY: Department of Energy (DOE).

ACTION: Amendment of Existing Systems of Records.

SUMMARY: Federal Agencies are required by the Privacy Act of 1974 (Pub.L. 93-579, 5 U.S.C. 552a) to publish notice in the **Federal Register** of proposed amendments to the routine uses of existing systems of records. The Department of Energy proposes to amend twelve existing systems of records to permit disclosure to health studies advisory entities and disclosure for epidemiological and other health studies and surveys as a routine use of data contained in these systems. In certain of these systems, the proposed amended routine use disclosures will replace previously established routine uses pertaining to health studies so that these systems will reflect the Department's health studies program as it is currently constituted. The text of this notice itemizes the previously established routine uses and the proposed new routine uses for each of the twelve systems.

The systems of records to be amended are: DOE-01, DOE Personnel and General Employment Records; DOE-05, Personnel Records of Former Contractor Employees; DOE-13, Payroll and Leave Records; DOE-33, Personnel Medical Records; DOE-35, Personnel Radiation Exposure Records; DOE-36, Statistical Analysis Using Personnel Security Questionnaire (Health and Mortality Study); DOE-38, Occupational and Industrial Accident Records; DOE-40, Contractor Employees Insurance Claims; DOE-67, Participants in Experiments, Studies, and Surveys; DOE-71, The Radiation Accident Registry; DOE-72, The Department of Energy Radiation Study Registry; and DOE-73, The US-DTPA Registry.

DATES: The proposed revisions will become effective without further notice 40 days after publication in the **Federal Register** (August 7, 1995), unless comments are received on or before that date that would result in a contrary determination and a notice is published to that effect.

ADDRESSES: Written comments should be directed to the following address: Director, FOIA/Privacy Act Division, Office of Executive Secretariat, U.S. Department of Energy, HR-78, 1000 Independence Avenue, SW, Washington, DC 20585. Written comments will be available for

inspection at the above address between the hours of 9 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: (1) Heather Stockwell, Acting Director, Office of Epidemiologic Studies, EH-62, U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20874-1290, (301) 903-3721 or (2) GayLa D. Sessoms, Director, FOIA/Privacy Act Division, HR-78, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586-5955 or (3) Harold Halpern, Office of General Counsel, GC-80, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585, (202) 586-7406.

SUPPLEMENTARY INFORMATION: The Department proposes to amend the routine uses of twelve existing systems of records to permit information contained in those systems to be used in epidemiological studies and surveys. The text of this notice contains a description of each of these twelve systems of records, which was published by the National Archives and Records Administration's Office of the Federal Register in Volume I of the Federal Register's 1993 Privacy Act Issuances and Compilations. The text of this notice also includes the proposed new routine uses for each system of records.

The Department has established an epidemiology and health surveillance program to determine the health effects of the Department's activities on workers and populations having access, or in proximity, to the Department's facilities. Epidemiological studies are an important means of improving public health. They permit the scientific evaluation of the effects of exposure to potentially harmful materials by determining and quantifying health effects associated with such exposures. Health surveys, which are used to assess immediate health issues, are designed to discover the occupational source of outbreaks of illness, injury, or death, and to describe the extent of exposure to specific substances at a single point in time. Surveillance is used to identify new and emerging health problems by monitoring groups of workers, who have the same job or exposures, for changes in their illness and injury patterns over time.

Seven of these systems already have routine uses for epidemiological and health studies: DOE-5, DOE-35, DOE-36, DOE-67, DOE-71, DOE-72, DOE-73. The proposed amendments to the existing routine uses of these seven systems and the addition of these routine uses to the other five systems of records will assist the Department in

studying and monitoring individual and aggregate population health risks from exposures to radiation or other hazards that may have occurred as a result of the Department's operations and other energy related activities.

Pursuant to Memoranda of Understanding with the Department of Health and Human Services ("HHS"), 56 FR 9701, March 7, 1991, and the Agency for Toxic Substances and Disease Registry ("ATSDR"), October 10, 1990, studies, surveys and surveillances will be conducted by units of the Public Health Service, including the National Institute for Occupational Safety and Health and the National Center for Environmental Health of the Centers for Disease Control and Prevention (CDC), and ATSDR, their contractors, grantees, and cooperative agreement holders.

The studies are focussed on a variety of areas that are important for assessing the real and potential health risks to workers and the public resulting from the Department's energy-related technologies and activities. The studies should provide information that is necessary for long-range energy planning pursuant to continued development of the national energy strategy. The health studies include all Department facilities and workers, including contractor employees, and other special populations that have relevance to the Department's mission. States also may perform studies as the Department's or the Department of Health and Human Services' contractors, grantees, or cooperative agreement holders.

The proposed additional routine uses to the twelve systems are:

(1) A record from this system of records may be disclosed to facilitate health hazard evaluations, epidemiological studies, or public health activities required by law performed by personnel, contractor personnel, grantees, and cooperative agreement holders of components of the Department of Health and Human Services, including the National Institute for Occupational Safety and Health and the National Center for Environmental Health of the Centers for Disease Control and Prevention, and the Agency for Toxic Substances and Disease Registry pursuant to Memoranda of Understanding between the Department and the Department of Health and Human Services or its components.

(2) Subject to the same Privacy Act limitations applicable to employees of the Department, a record from this system of records may be disclosed as a routine use to contractors, grantees,

participants in cooperative agreements, collaborating researchers, or their employees in performance of health studies or related health or environmental duties pursuant to their contracts, grants, and cooperating or collaborating research agreements. In order to perform such studies, the Department, its contractors, grantees, participants in cooperative agreements, and collaborating researchers may disclose a record to: Federal, state, and local health and medical agencies or authorities; to subcontractors in order to determine a subject's vital status or cause of death; to health care providers to verify a diagnosis or cause of death; or to third parties to obtain current addresses for participants in health-related studies, surveys and surveillances. All recipients of such records are required to comply with the Privacy Act, to follow prescribed measures to protect personal privacy, and to disclose or use personally identifiable information only for the above described research purposes.

(3) A record from this system of records may be disclosed to members of DOE advisory committees, the Department of Health and Human Services Advisory Committee on Projects Related to Department of Energy Facilities, and to designated employees of Federal, State, or local government or government-sponsored entities authorized to provide advice to the Department concerning health, safety or environmental issues. All recipients of such records are required to comply with the Privacy Act, to follow prescribed measures to protect personal privacy, and to disclose or use personally identifiable information only for the purpose of providing advice to the Department or to the Department of Health and Human Services.

The proposed amendments should not have adverse privacy consequences. Health studies tend to benefit persons in the studied populations by identifying possible toxic agents. Individuals are never identified in published studies and the studies are not used to support determinations concerning any individual's rights, benefits, or privileges.

Furthermore, privacy interests will be protected by a number of means. As a condition of releasing individually identifiable information for studies, surveys or surveillances conducted for DOE, persons conducting studies will be required to: (1) Keep personal information confidential; (2) use personal information only for purposes of studies in which there is no publication of the identity of any individual subject; (3) consult with DOE

prior to any release of personally identifiable information obtained from DOE; (4) establish reasonable administrative, technical and physical safeguards to prevent unauthorized use or disclosure of the record; (5) make no further use or disclosure of the record except (a) in emergency circumstances affecting the health or safety of any individual, (b) for use in another research project under these same conditions and with written authorization of the Department, (c) for disclosure to an authorized person for the purpose of an audit related to the research project, and (d) when required by law. Additionally, the Department will secure a written statement attesting to the recipient's understanding of, and willingness to abide by, these provisions. The provisions in this paragraph apply to DOE collaborating researchers, not those studies being performed by the Department of Health and Human Services.

Privacy safeguards are in place regarding the studies to be conducted pursuant to the Memoranda of Understanding with Department of Health and Human Services or its components. Department of Health and Human Services has agreed: (1) Not to use or disclose any personally-identifiable information obtained from DOE or its contractors and grantees except for research purposes or other public health activities required by law; (2) not to use information in identifiable form to make any determination about the rights, benefits, or privileges of any individual; (3) to use and disclose information in accord with agreements under which the personally-identifiable information was obtained by the Department or its contractors, provided such use or disclosure is consistent with applicable law; (4) to notify the Department of any efforts to use or obtain personally-identifiable information for purposes other than research or other public health activities required by law; (5) to use and take appropriate steps to prevent improper disclosure; (6) to establish or modify Privacy Act systems of records broadening the "Categories of Individuals" section to specifically address information provided by DOE, as necessary, and consult with the Department concerning provisions of Privacy Act systems of records notices. Additionally, Department of Health and Human Services requires its contractors, grantees, and cooperative agreement holders performing epidemiological studies and other public health activities to abide by conditions similar

to those imposed by the Department, as described in this paragraph.

The types of records needed will be determined by the design and goals of each particular study. Examples of possible types of data needed from the twelve systems of records include, questionnaires, demographic information, work history, medical and reproductive history, birth data, radiation and other exposure history, laboratory test results, data from prior health studies, surveys, and surveillances; and alcohol and tobacco use history. Data of this type are found in records such as health study or personnel files and lists, training files, medical records, legal case files, bioassay records, industrial hygiene files, radiation and other hazard exposure records, occupational and industrial accident records, employee medical insurance claims, personnel security clearance questionnaires, and employee and visitor access control records.

In 1989, the Department published a proposed establishment of two routine uses for DOE-5, DOE-33, DOE-35, DOE-71, DOE-72, and DOE-73 (54 FR 47808 dated November 17, 1989). The two proposed routine uses were published as follows: (1) "A record from this system of records may be disclosed to researchers for the purpose of conducting an epidemiological study of workers at a DOE facility if their proposed studies have been reviewed by the National Academy of Sciences and deemed appropriate for such access. A researcher granted access to these records shall be required to sign an agreement to protect the confidentiality of the data and be subject to the same restrictions applicable to DOE officers and employees under the Privacy Act." (2) "A record from this system of records may be disclosed to a member of an advisory committee for purposes of conducting a review of the DOE's epidemiologic program. Members of an advisory committee who obtain access to the records shall be subject to the same restrictions applicable to DOE officers and employees under the Privacy Act." The Department received comments to the contrary on the proposed routine uses, but did not publish a response to the comments. This notice eliminates the above-mentioned routine uses and proposes to establish new routine uses for the twelve systems of records for the purposes of performing epidemiological studies.

The Department is submitting the report required by Office of Management and Budget Circular A-130 concurrently with the publication of

this notice. The text of this notice contains the information required by section (e)(4)(d) of the Privacy Act, 5 U.S.C. 552a(e)(4)(d).

Issued in Washington, DC this 19th day of June, 1995.

Thomas T. Tamura,

Principal Deputy Assistant Secretary for Human Resources and Administration.
