ADDRESSES: The permit and related documents are available for review by interested persons in the following offices by appointment:

FOR FURTHER INFORMATION CONTACT: Kellie M. Foster (301/713-1401) or Ruth Johnson (301/713-2289).

SUPPLEMENTARY INFORMATION: On April 21, 1995, notice was published in the **Federal Register** (60 FR 19888) that a permit had been requested by the above-named organization. The requested permit has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the

Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*), and the Regulations Governing the Taking, Importing, and Exporting of Endangered Species (50 CFR part 222).

The permit authorized the holder to take a maximum of 125 Steller sea lions (*Eumetopias jubatus*) by trapping, darting, sampling, and gas anesthesia (including a maximum of 20 by recapture for follow-up blood sampling and removal of instruments); a maximum of 400 Steller pups over 6 months old by hand capture, gas anesthesia, and marking; a maximum of 10,000 Stellers by harassment during the course of capturing suitable animals; a maximum of 15 Stellers by unintentional mortality during the course of capture and chemical immobilization and salvaged specimens of stranded animals, premature pups, and mortalities associated with this and other research activities. The applicant is also authorized to take up to 30 rehabilitated California sea lions (*Zalophus californianus*) by injection with experimental immobilization drugs and a maximum of 3 for unintentional mortality. All takes will be over a 5-year period. The objectives of the research are to: (1) Develop a consistent, safe, and reliable chemical restraint and anesthesia protocol for various age classes and sexes of Steller sea lions using California sea lions; (2) determine the differences between movements, feeding patterns, diving behavior, habitat use, and patterns of the eastern and western stocks to better understand the significance of interactions between Steller sea lions and commercial fisheries; (3) determine the differences of condition indices, the prevalence of disease agents, and the levels of pollutants found in tissues between the eastern and western stocks; (4) determine dispersal area and extent of mixing of eastern and western stock pups; and (5) develop and test a safe and reliable winter capturing method for sea lions.

Issuance of this permit, as required by the Endangered Species Act of 1973, was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of this permit; and (3) is consistent with the purposes and policies set forth in section 2 of the Endangered Species Act.

Dated: June 20, 1995.
