Title: Motor Vehicle Exclusion Request (EPA ICR #0012.09; OMB #2060-0124). This ICR requests renewal of the existing clearance.

Abstract: Motor vehicle and nonroad engine manufacturers may request that the Environmental Protection Agency determine whether a particular type of vehicle is excluded from coverage under Title II of the Clean Air Act.

Manufacturers requesting EPA to make this determination must submit specifications of the vehicle, including its size, use, and top speed. The Agency will use the information to determine whether a motor vehicle or nonroad engine is excluded from the requirement to have a certificate of conformity.

Burden Statement: The public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: vehicle manufacturers.

Estimated number of respondents: 210.

Estimated annual burden: 210 hours.

Frequency of collection: on occasion.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, (please refer to EPA ICR #0012.09 and OMB #2060-0124) to:

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before July 31, 1995.

FOR FURTHER INFORMATION CONTACT:

For further information, or a copy of this ICR, contact Sandy Farmer at (202) 260-2740, please refer to EPA ICR #1084.04.

SUPPLEMENTARY INFORMATION:**Office of Air and Radiation**

Title: New Source Performance Standard for Nonmetallic Mineral Processing Plants (EPA ICR #1084.04; OMB #2060-0050).

Abstract: This ICR is for an extension of an existing information collection in support of the Clean Air Act, as described under the general NSPS at 40 CFR 60.7-60.8, and the specific NSPS, regulating emissions from nonmetallic mineral processing plants, at 40 CFR 60.674-60.676. The EPA will use the information to direct monitoring, inspection, and enforcement efforts, thereby ensuring compliance with the NSPS.

Under this ICR owners and operators of new facilities, must provide EPA, or a delegated State or local authority, with: (1) Notification of construction or reconstruction, (2) notification of anticipated and actual dates of facility start-up, and (3) notification of the date of the initial performance test of the wet scrubber and a copy of the test results, (4) notification of demonstration of the continuous monitoring system, and (5) notification that the CMS data will be used during the initial performance test.

Owners and operators of facilities that were constructed or reconstructed, or modified prior to September 1, 1983 are exempt from this New Source Performance Standard. Owners or operators of exempted facilities may replace a piece or pieces of equipment with equal or smaller size piece(s) that perform the same function (provided that they do not replace the entire production line) without falling subject to this NSPS. An exemption report, however must be submitted to the Administrator describing: (1) Size and age of existing facility and the size of the new facility, (2) a description of the control device used on the existing

facility, and a list of all facilities using the control device.

Owners and operators of all affected facilities must provide EPA, or a delegated State or local authority, with: (1) Reports, semiannually, of instances when scrubber pressure drop and liquid flow rate differ by more than 30% from the rates recorded during the most recent performance test; and (2) any physical or operational change to their facility which may increase the regulated pollutant emission rate. All facilities must maintain records on the facility operation that document: (1) The occurrence and duration of any start-ups, shutdowns, and malfunctions; (2) daily CMS readings; and (3) initial performance test conditions, measurements, and results.

Burden Statement: Public reporting burden for this collection of information is estimated to average 78 hours per response, including time for reviewing instructions, searching existing data sources, gathering the data needed, completing the collection of information and maintaining records.

Respondents: Facilities in fixed or portable nonmetallic mineral processing plants.

Estimated Number of Respondents: 84.

Estimated Total Annual Burden on Respondents: 6,572.

Frequency of Collection: Semiannual reporting for existing facilities, with additional one-time reporting requirements for new facilities. Daily recordkeeping for all facilities.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, (please refer to EPA ICR #1084.04 and OMB #2060-0050) to:
