BILLING CODE 4184-01-M

Cooked/Frozen Shrimp—Adulterated by Decomposition,” because it no longer reflects FDA policy. The CPG provides guidance on when entries of canned and cooked/frozen shrimp should be detained based on decomposition. The CPG focuses on the results of analysis for indole levels in the shrimp. The mere absence of indole does not mean, however, that the shrimp is acceptable. Organoleptic analysis can also be used to determine whether the shrimp is adulterated.

FDA’s experience using CPG 7119.13 as guidance has been that this CPG has been subject to misinterpretation by industry. To minimize the apparent confusion that exists as a result of this misinterpretation, FDA has decided to revoke the CPG. FDA intends to use any appropriate methods of analysis for examining canned and cooked/frozen shrimp offered for import.
