

an extension of the consultation and comment period on the rate increases for Firm Power, Firm and Non-Firm Transmission from the Parker-Davis Project, and Firm transmission service for SLCA/IP. These rates were originally announced in the **Federal Register** on March 21, 1995, at 60 FR 14935-14936.

This Act is taken in response to public comments that additional time is needed for review and comments on the following issues: (1) the most current operation and maintenance numbers for the Bureau of Reclamation, (2) the current multi-project costs and revenues, (3) the new methodology for interest offsets, (4) the compound interest amortization for repayment of Parker-Davis investments, (5) the 5-year cost ratesetting methodology, (6) the annual carry-over of revenues, (7) the crosswalk adjustments.

PROCEDURES: Concurrently with publication of this notice, a letter explaining the changes in detail along with a revised power repayment study will be distributed to the Parker-Davis power and transmission customers, to the SLCA/IP transmission customers, and to other interested parties. Customers and interested parties are invited to comment on the proposed rates and the methodology used to develop the rates. Comments already submitted will be given full consideration in this extended comment period and do not need to be resubmitted.

Following the close of the consultation and comment period, Western will prepare another power repayment study which will include any changes due to consideration of public comments. Western will recommend the results of those studies as the final proposed rates to the Deputy Secretary to be placed in effect on an interim basis prior to submission to the Federal Energy Regulatory Commission (FERC) for approval on a final basis.

EFFECTIVE DATE: The consultation and comment period will be extended to July 12, 1995. Written comments should be received by the end of the consultation and comment period to be assured consideration. Comments may be sent to: Mr. Tyler Carlson, Area Manager, Western Area Power Administration, Phoenix Area Office, P.O. Box 6457, Phoenix, AZ 85005-6457, (602) 352-2523.

SUPPLEMENTARY INFORMATION: Power and transmission rates for the Parker-Davis Project are established pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*) and the Reclamation Act of 1902 (43 U.S.C. 388 *et seq.*), as amended and supplemented

by subsequent enactments, particularly section 9(c) of the Reclamation Project of 1939 (43 U.S.C. 485h(c)) and other acts specific to the project.

By Amendment No. 3 to Delegation Order No. 0204-108, published November 10, 1993 (58 FR 59716), the Secretary of Energy delegated (1) the authority to develop long-term power and transmission rates on a nonexclusive basis to the Administrator of Western; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary; and (3) the authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove such rates to FERC. Existing DOE procedures for public participation in power rate adjustment (10 CFR Part 903) became effective on September 18, 1985 (50 FR 37835).

AVAILABILITY OF INFORMATION: All brochures, studies, comments, letters, memoranda, and other documents made or kept by Western for the purpose of developing the proposed rates for firm power and firm and nonfirm transmission service are and will be made available for inspection and copying at the Phoenix Area Office, located at 615 South 43rd Avenue, Phoenix, AZ 85005.

Issued in Golden, Colorado, June 26, 1995.

J.M. Shafer,
Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-5255-3]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before August 7, 1995.

FOR FURTHER INFORMATION CONTACT: For further information, or for a copy of this ICR, contact Sandy Farmer at (202)

260-2740, please refer to EPA ICR #1587.03.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Clean Air Act, Title V—Operating Permits Regulations—Information Requirements, (EPA ICR #1587.03; OMB #2060-0234).

Abstract: This ICR is for an extension of an existing information collection in support of the Clean Air Act, as described in 40 CFR Part 70 establishing the minimum elements governing the development of State operating permit programs. Under this ICR, state and local government permitting authorities and stationary sources of air pollution will incur costs and burden.

Permitting authorities have been working on their Title V programs since the promulgation of the original ICR on 7/1/92. EPA is currently reviewing Title V programs submitted by State and local agencies. State and local authorities must provide EPA with the following: (1) Title V permit program; (2) permit applications and proposed permits; and (3) upon occurrence, applications for permit revisions and proposed revisions.

Under this ICR owners and operators of affected sources must provide the State or local permitting authority with: (1) An operating permit application every 5 years; (2) semi-annual submission of monitoring or recordkeeping data; (3) annual certification of compliance; and (4) upon occurrence, applications for permit revisions. Sources must maintain all records that are representative of compliance with the Title V program.

Burden Statement: Total annual public reporting burden for this collection of information is estimated to be 648,293 hours, for an average of 5,788 hours per respondent, including time for reviewing instructions, searching existing data sources, gathering the data needed, completing the collection of information and maintaining records.

Respondents: State and local governments and stationary sources.

Estimated Total Annual Burden on Respondents: 648,293 hours.

Estimated Number of Respondents: 112.

Frequency of Collection: Semi-annually, annually, upon occurrence and every 5 years.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, (please refer to EPA ICR #1587.03 and #2060-0243) to:

Sandy Farmer, EPA ICR #1587.03, U.S. Environmental Protection Agency, Information Policy Branch (2136), 401 M Street, SW, Washington, DC 20460.
and

Chris Wolz, OMB #2060-0243, Office of Management and Budget, Office of Information and Regulation Affairs, 725 17th Street, NW., Washington, D.C. 20503.

Dated: June 30, 1995.

Joseph Retzer,

Director, Regulatory Information Division.

Office of Solid Waste and Emergency Response

Title: Community Right-to-Know Reporting Requirement (EPCRA sections 311 and 312)—EPA #1352; OMB #2050-0072.

Abstract: Section 311 of the Emergency Planning and Community Right-to-Know Act (EPCRA) allows the public to have access to the same Material Safety Data Sheets (MSDSs) as facilities provide for their employees. In order to have to report, a facility must be required to have or maintain MSDSs for hazardous chemicals under the Hazard Communication Standard of the Occupational Safety and Health Administration (OSHA). The owner and/or operator of the facility would need to submit the MSDS (or a list of subject chemicals) to their state emergency response commission (SERC), their local emergency planning committee (LEPC) and their local fire

department for all hazardous chemicals it has over the reporting thresholds. The current reporting thresholds are 10,000 pounds unless the chemical is specifically listed as an extremely hazardous substance under EPCRA section 302, whereby the reporting threshold becomes 500 pounds or the threshold planning quantity (TPQ), whichever is less.

This one-time requirement was due October 17, 1987. However, facilities need to submit updates to the list or MSDSs, within three months, when a hazardous chemical comes on-site above the reporting threshold. If significant new information arises concerning a previously submitted MSDS, a facility must submit the revised MSDS. Additionally, if the SERC or LEPC receives a request, the facility needs to provide the MSDS even if the hazardous chemical is stored below the reporting threshold.

Section 312 of EPCRA requires EPA to publish two Emergency and Hazardous Chemical Inventory Forms known as "Tier I" and "Tier II." A facility that needs to submit the MSDSs or list in section 311, needs to submit a Tier I Form annually on March 1, incorporating the chemicals reported under section 311. These Tier I Forms are submitted to the SERC, LEPC and local fire department.

The Tier I form includes the following information as required by the statute:

- An estimate in ranges of the maximum amount of hazardous chemicals in each hazard category present at the facility at any time during the previous year;
- An estimate in ranges of the average daily amount of hazardous chemicals in each hazard category.

EPA has added the following information by regulation:

- Primary SIC code and Dunn and Bradstreet Number (added to facilitate entering and sorting the information on a computer).
- Two emergency contacts (added to give SERCs, LEPCs and fire departments a contact at the facility who could clarify information at any time, particularly in the event of an emergency).
- Number of days on-site produces a more accurate figure for average daily amount, particularly for those chemicals that are on-site for only a short period of time each year.

The Tier II Form requires facilities to provide chemical specific inventory information. It only needs to be submitted if it requested by the SERC or LEPC.

Section 311 allows emergency responders to know the hazards

associated with the facility's chemicals before they come on-site.

Local planners can use their information to supplement the emergency planning requirements under section 303 of EPCRA. The community is allowed to have this information under "community right-to-know," in a way to allow the community to understand the hazards of chemicals in their community.

The annual inventory under section 312 of EPCRA is used in conjunction with the information provided under section 311 to link the quantity and location of chemicals with the hazards associated with the chemicals.

Burden Statement: The average reporting burden for regulated facilities is estimated to be 2,952,764 hours. This estimate includes determination of reporting obligation, submission of MSDSs (or list), and the development and submission of Tier I and Tier II forms.

The average burden on states and local communities (SERCs and LEPCs) is estimated to be 2,987 hours. This estimate includes providing MSDSs and Tier I/Tier II forms upon request.

Respondents: All states are required to create state emergency response commissions (SERCs) and local emergency planning committees (LEPCs). Both the manufacturing and non-manufacturing sectors are subject to these requirements.

Estimated No. of Respondents: 869,809 (866,285 facilities, 3,524 state/local communities).

Estimated Number of Responses Per Respondent: 1.

Frequency of Collection: Annual.

Estimated Total Annual Burden Costs: 2,955,751 hours.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, (please refer to EPA ICR #1352.03) to:
