### Endangered Species; Permits

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Receipt of an application for modification 3 to scientific research and enhancement permit 822 (P500B).

**SUMMARY:** Notice is hereby given that the Fish Passage Center (FPC) in Portland, Oregon has applied in due form for a modification to their permit that authorizes a take of listed species for the purpose of scientific research and enhancement.

**DATES:** Written comments or requests for a public hearing on this application must be received on or before August 7, 1995.

**ADDRESSES:** The application and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Environmental and Technical Services Division, F/NWO3, NMFS, 525 NE Oregon Street, Portland, OR 97232-4169 (503-230-5400).

Written comments or requests for a public hearing on this application should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

**SUPPLEMENTARY INFORMATION:** FPC requests the modification to their permit under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-227).

Permit 822 (P500B) authorizes an annual take of juvenile, threatened, naturally-produced, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*); juvenile, threatened, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*); and juvenile, endangered, Snake River sockeye salmon (*Oncorhynchus nerka*) associated with research sampling activities conducted in accordance with the Smolt Monitoring Program. The research sampling activities occur at Bonneville, John Day, and McNary

Dams on the Columbia River; Lower Monumental, Little Goose, and Lower Granite Dams on the Snake River; and at the Salmon, Grande Ronde, Clearwater, and Snake River traps.

For modification 3, FPC requests an increase in the annual take of juvenile, listed, spring/summer chinook salmon and juvenile, listed, sockeye salmon. Due to the fact that the progeny of listed Snake River salmon are considered ESA listed fish, even if propagated in a hatchery, FPC has redetermined the annual numbers of listed fish handled, and the corresponding indirect mortalities, associated with their research activities. In addition, the annual number of sockeye/kokanee observed at Lower Granite Dam, as compared with historic passage data, has increased. The annual increase of migrating sockeye/kokanee is due to an increase in the number of true migratory sockeye leaving Redfish Lake in Idaho, as a result of the Idaho Department of Fish and Game's work at rebuilding the run, and large numbers of resident kokanee being washed out of Dworshak Reservoir in Idaho during periods of spill at Dworshak Dam. Modification 3 is requested for the duration of the permit. Permit 822 expires on December 31, 1997.

Those individuals requesting a hearing on this modification application should set out the specific reasons why a hearing would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: June 29, 1995.
