If any non-full-size cribs subject to provisions of 16 CFR 1500.18(a)(14) and Part 1509 fail to comply in a manner severe enough to warrant a recall, the required records can be used by the manufacturer or importer and by the Commission to identify those persons and firms who should be notified of the recall.

Notification of Request for Extension of Approval of Information Collection Requirements; Mattress Flammability Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through September 30, 1998, of information collection requirements in the Standard for the Flammability of Mattresses and Mattress Pads (16 CFR Part 1632). The standard is intended to reduce unreasonable risks of burn injuries and deaths from fires associated with mattresses and mattress pads. The standard prescribes a test to assure that a mattress or mattress pad will resist ignition from a smoldering cigarette. The standard requires manufacturers to perform prototype tests of each combination of materials and construction methods used to produce mattresses or mattress pads and to obtain acceptable results from such testing. Sale or distribution of mattresses without successful completion of the testing required by the standard violates section 3 of the Flammable Fabrics Act (15 USC 1192). An enforcement rule implementing the standard requires manufacturers to maintain records of testing performed in accordance with the standard and other information about the mattress or mattress pads which they produce.
