#### Notice of Availability of a Finding of No Significant Impact (FONSI) for the Construction of an 18-hole Golf Course at Andrews Air Force Base, Maryland

The U.S. Air Force (USAF) is proposing the construction of an 18-hole golf course in accordance with the National Environmental Policy Act (NEPA) the Council on Environmental Quality regulations implementing NEPA, the Department of Defense Directive (DOD) 6050.1, and Air Force Instruction 32-7061. These directives require the USAF to consider environmental consequences when authorizing or approving federal actions.

The USAF has prepared an Environmental Assessment (EA) analyzing the potential environmental consequences of the proposed golf course construction.

On the basis of the EA, we conclude the implementation of the proposed action will not have a significant effect on the quality of the environment at Andrews Air Force Base and, as a result, an Environmental Impact Statement is not warranted.

Comments on this FONSI must be received on or before 16 Aug 95 and may be addressed to Lt Col Michael Newberry, 89 CES/CEV, 3465 North Carolina St, Andrews AFB, MD, 20331-4803, Telephone (301) 981-2579.

### Financial Assistance Award: Ecomat, Inc.

**AGENCY:** Department of Energy.

**ACTION:** Notice of intent.

**SUMMARY:** The U.S. Department of Energy announces that pursuant to 10 CFR 600.6(a)(2) it is making a financial assistance award under Grant Number DE-FG01-95EE15631 to Ecomat, Inc. The proposed grant will provide funding in the estimated amount of \$98,900 by the Department of Energy for the purpose of saving energy through development of the inventor's "Foamed Recyclables."

**SUPPLEMENTARY INFORMATION:** The Department of Energy has determined in accordance with 10 CFR 600.14(e)(1) that the unsolicited application for financial assistance submitted by Ecomat, Inc., is meritorious based on the general evaluation required by 10 CFR 600.14(d) and that the proposed project represents a unique idea that would not be eligible for financial assistance under a recent, current or planned solicitation. The new technology is a process to develop environmentally safe synthetic building materials, such as siding, slate, and lumber, composed of dual polymers and industrial waste filler. The use of fly ash or red mud fillers halves the amount of needed polymers, which are petroleum-based, energy intensive materials. Moreover, the invention's light weight will lower transportation fuel expenditures compared to conventional building materials, and reduce buttressing requirements of houses, leading to lower overall building costs. The inventor and principal investigator, John N. Mushovic, Ph.D., is the executive vice-president of Ecomat, Inc. He holds six patents and has over 25 years experience in commercializing plastics technologies. Ecomat, Inc., will utilize its engineering facilities, as well as

those of the Hoppmann Corporation, for designing, constructing, and operating the production prototype unit. The proposed project is not eligible for financial assistance under a recent, current, or planned solicitation because the funding program, the Energy-Related Inventions Program (ERIP), has been structured since its beginning in 1975 to operate without competitive solicitations because the authorizing legislation directs ERIP to provide support for worthy ideas submitted by the public. The program has never issued and has no plans to issue a competitive solicitation. This award will be made 14 calendar days after publication to allow for public comment.

### FOR FURTHER INFORMATION CONTACT:

Please write the U.S. Department of Energy, Office of Placement and Administration, ATTN: Rose Mason, HR-531.21, 1000 Independence Avenue SW., Washington, DC 20585.

The anticipated term of the proposed grant is 18 months from the date of the award.

### Notice of Prototype Spent Nuclear Fuel Dry Transfer System Project

**AGENCY:** Office of Civilian Radioactive Waste Management, DOE.

**ACTION:** Notice to interested sources.

**SUMMARY:** The U.S. Department of Energy is currently engaged in a cooperative agreement with the Electric Power Research Institute (EPRI) to design a spent nuclear fuel dry transfer system. The design for this system is being developed by Transnuclear, Inc. under a subcontract from EPRI. The system will enable the transfer of individual spent nuclear fuel assemblies from a conventional top loading transfer cask to a multi-purpose canister (MPC) in a shielded overpack, or accommodate spent nuclear fuel transfers between two conventional casks. DOE is inviting letters of interest from potential sources to fabricate, demonstrate and/or license this system.

**DATES:** Letters of interest must be received no later than August 30, 1995.

**ADDRESSES:** Letters of interest should be sent to the U.S. Department of Energy, Attn: Michelle Miskinis, HR-561.21, 1615 M Street NW., Washington, DC 20036.
