SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is a final rule, which involves the removal of Class E airspace at El Campo, TX, and was not preceded by notice and public

procedure, comments are invited on the rule. This rule will become effective on November 9, 1995. However, after the review of any comments, if the FAA finds that further changes are appropriate, it will initiate rulemaking proceedings to extend the effective date or to amend the regulation.

Interested parties are invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule, and in determining whether additional rulemaking is required.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

The amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) removes the Class E airspace providing controlled airspace for IFR operations at El Campo, TX. The permanent closing of the El Campo Metro Airport, El Campo, TX removes the need to have designated Class E airspace for IFR operations at the airport. The Class E airspace at El Campo, TX, will be removed by this final rule, effective on November 9, 1995.

Since this action merely involves the removal of Class E airspace as a result of the permanent closing of El Campo Metro Airport, El Campo, TX, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

The FAA has determined that this regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.
