NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a guide planned for its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and

data needed by the staff in its review of applications for permits and licenses.

The draft guide is a proposed Revision 2 to Regulatory Guide 1.149, and it is temporarily identified as DG-1043, "Nuclear Power Plant Simulation Facilities for Use in Operator License Examinations." The guide will be in Division 1, "Power Reactors." This regulatory guide is being revised to describe methods acceptable to the NRC staff for complying with those portions of the Commission's regulations regarding (1) certification of a simulation facility consisting solely of a plant-referenced simulator and (2) application for prior approval of a simulation facility for testing. This guide endorses, with clarifications and exceptions, an American National Standards Institute/American Nuclear Society standard, ANSI/ANS-3.5-1993, "Nuclear Power Plant simulators for use in Operator Training and Examination."

The draft guide has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by September 15, 1995.

Although a time limit is given for comments on this draft guide, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Comments may be submitted electronically, in either ASCII text or Wordperfect format (version 5.1 or later), by calling the NRC Electronic Bulletin Board on FedWorld. The bulletin board may be accessed using a personal computer, a modem, and one of the commonly available communications software packages, or directly via Internet.

If using a personal computer and modem, the NRC subsystem on FedWorld can be accessed directly by dialing the toll free number: 1-800-303-9672. Communications software parameters should be set as follows: parity to none, data bits to 8, and stop bits to 1 (N,8,1). using ANSI or VT-100 terminal emulation, the NRC NUREGs and RegGuides for Comment subsystem can then be accessed by selecting the "Rules Menu" option from the "NRC at FedWorld, consult the "Help/

Information Center" from the "NRC Main Menu." Users will find the "FedWorld Online user's Guides" particularly helpful. Many NRC subsystems and data bases also have a "Help/Information Center" option that is tailored to the particular subsystem.

The NRC subsystem on FedWorld can also be accessed by a direct dial phone number for the main FedWorld BBS, 703-321-3339, or by using Telnet via Internet, fedworld.gov. If using 703-321-3339 to contact FedWorld, the NRC subsystem will be accessed from the main FedWorld menu by selecting the "Regulatory, Government Administration and State Systems," then selecting "Regulatory Information Mall." At that point, a menu will be displayed that has an option "U.S. Nuclear Regulatory Commission" that will take you to the NRC Online main menu. The NRC Online area also can be accessed directly by typing "/go nrc" at a FedWorld command line. If you access NRC from FedWorld's main menu, you may return to FedWorld by selecting the "Return to FedWorld" option from the NRC Online Main Menu. However, if you access NRC at FedWorld by using NRC's toll-free number, you will have full access to all NRC systems but you will not have access to the main FedWorld system.

If you contact FedWorld using Telnet, you will see the NRC area and menus, including the Rules men. Although you will be able to download documents and leave messages, you will not be able to write comments or upload files (comments). If you contact FedWorld using FTP, all files can be accessed and downloaded but uploads are not allowed; all you will see is a list of files without descriptions (normal Gopher look). An index file listing all files within a subdirectory, with descriptions, is included. There is a 15-minute time limit for FTP access.

Although FedWorld can be accessed through the World Wide Web, like FTP that mode only provides access for downloading files and does not display the NRC Rules menu.

For more information on NRC bulletin boards call Mr. Arthur Davis, Systems Integration and Development Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415-5780; e-mail AXD3@nrc.gov. For more information on this draft regulatory guide, contact F. Collins at the NRC, telephone (301) 415-3173, e-mail JFC1@nrc.gov; or R. Auluck, telephone (301) 415-6608, e-mail RCA@nrc.gov.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW.,

Washington, DC. Requests for single copies of draft or final guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Distribution and Mail Services Section; or by fax at (301) 415-2260. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

Commonwealth Edison Co. (Zion Nuclear Power Station, Unit 1); Exemption

I

Commonwealth Edison Company (ComEd or the licensee) is the holder of Facility Operating License No. DPR-39, which authorizes operation of the Zion Nuclear Power Station, Unit 1, at a steady-state reactor power level not in excess of 3250 megawatts thermal. The facility is a pressurized water reactor located at the licensee's site in Lake County, Illinois. The license provides, among other things, that the Zion Nuclear Power Station is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (the Commission or NRC) now or hereafter in effect.

II

Section III.D.1.(a) of appendix J to 10 CFR part 50 requires the performance of three Type A containment integrated leakage rate tests (ILRTs) at approximately equal intervals during each 10-year inservice inspection period. Furthermore, the third test of each set is to be conducted during the shutdown for the 10-year plant inservice inspections.

III

In a letter dated May 12, 1995, the licensee requested relief from the requirement to perform a set of three Type A tests at approximately equal intervals during each 10-year inservice
