

December 29, 1994, Chief Judge Paul Hatfield released his decision finding portions of the contested analysis to be adequate and a portion to be inadequate. Judge Hatfield ordered "that the Trail Creek final environmental impact statement is REMANDED for development and consideration of an alternative that preserves the roadless areas within the Trail Creek area."

This SEIS will respond directly to the court's order and will consider one additional alternative in addition to those analyzed in the 1990 Trail Creek FEIS. This additional alternative will keep all harvest and road activities outside of the Beaver Lake roadless area 1-003. In addition, the SEIS will address any changed conditions in the area that the agency has become aware of since the signing of the Record of Decision in 1990.

The purposes of the project remain the same as those stated in the 1990 FEIS. The proposal is designed to help achieve the goals, objectives, and standards of the 1986 Beaverhead Land and Resource Management Plan. More specifically the proposed action is designed to help satisfy the short-term demand for timber and maintain a continuous supply of timber in the future. Second, the proposed action is designed to produce a distribution of size and age classes of timber stands that are more resistant to insect infestations and disease than existing stands.

This project level SEIS tiers to the 1986 Beaverhead National Forest Land and Resource Management Plan (Forest Plan) and Final EIS, which provides overall guidance of all land management activities on the Beaverhead National Forest, including timber and road management. It will also tier to the 1990 Trail Creek FEIS, and will incorporate by reference the Trail Creek Supplemental Information Report, published April 2, 1991.

No additional scoping to identify issues and concerns is planned prior to the release of the Draft Supplemental Environmental Impact Statement. However, the Forest Service would like information concerning possible changed conditions within the Trail Creek project area that may affect project implementation. Changed conditions are those conditions which may not have been present and considered during the analysis of the original document.

The Agency is aware of three changed conditions within the project area that may affect the proposal. These changed conditions are: (1) The expanded Chief Joseph Cross Country Ski Trail system, with increased trail length and

recreational use; (2) the presence of the sensitive plant species *Allotropa virgata*, along with a draft Conservation Strategy to protect this species; (3) proposed harvest units have been marked, surveyed and cruised. This provides more accurate unit measurements than the predicted values used in the Trail Creek FEIS.

DATES: Written comments and suggestions on significant new circumstances, or new information relevant to environmental concerns with a bearing on this proposed project, or its impacts, should be received within 30 days following publication of this notice. A Draft Supplemental Environmental Impact Statement is scheduled for release on or about September 15, 1995.

ADDRESSES: Submit written comments and suggestions, or a request to be placed on the mailing list to Dennis Havig, District Ranger, Wisdom Ranger District, Beaverhead National Forest, Box 238, Wisdom, Montana 29761. Debbie Austin, Forest Supervisor, for the Beaverhead National Forest is the responsible official for this SEIS; written comments can be mailed to her as well at 420 Barrett, Dillon, Montana 59725.

FOR FURTHER INFORMATION CONTACT: Tom Malecek, SEIS Team leader, Wisdom Ranger District, Beaverhead National Forest (406) 689-3243.

SUPPLEMENTARY INFORMATION: Timber harvest and reforestation is proposed in 32 units over 696 acres, requiring approximately 4.9 miles of temporary and low standard road, yielding approximately 4.8 MMBF. All of the forested land involved has been designated as suitable for timber management by the Beaverhead Forest Plan. Unit boundaries near the Chief Joseph cross country ski trails will be modified to accommodate and protect skiing opportunities, and units with populations of *Allotropa virgata* will be adjusted to minimize impacts to the plants. All units have been inventoried to identify the distribution of these plants. All development activities in this alternative stay out of roadless lands.

The Beaverhead Forest Plan management direction used in the final EIS has not changed and provides the framework for the analysis of the new alternatives.

The range of alternatives, including those analyzed in the Trail Creek EIS, and the one proposed in this SEIS, examine varying levels and locations for the proposed activities to achieve the proposal's purposes, as well as to respond to the issues, other resource values, and any changed conditions in

the project area. One of the alternatives will be the "no action" alternative, in which none of the proposed activities would be implemented.

The SEIS will analyze the direct, indirect, and cumulative environmental effects of alternatives. Past, present and projected activities on both private and National Forest lands will be considered. This SEIS will disclose the analysis of site-specific mitigation measures and their effectiveness.

Public participation has played a very important part in the analysis of past alternatives. This Notice of Intent requests additional public participation in the manner described above. Since all issues and concerns were adequately presented in the EIS, the Forest Service requests only new information concerning changed conditions within the project area.

Dated: July 3, 1995.

Gerald W. Alcock,
Acting Forest Supervisor, Beaverhead
National Forest.
