Ambient Air Monitoring Reference and Equivalent Methods; Reference Method Designation

Notice is hereby given that EPA, in accordance with 40 CFR part 53, has designated another reference method for the measurement of ambient concentrations of nitrogen dioxide. The new reference method is an automated method (analyzer) which utilizes the measurement principle (gas phase chemiluminescence) and calibration procedure specified in appendix F of 40 CFR part 50. The new designated method is identified as follows:

RFNA-0795-104, "Environment S. A. Model AC 31 M Chemiluminescent Nitrogen Oxide Analyzer," operated with a full scale range of 0-500 ppb, at any temperature in the range of 15°C to 35°C, with 5-micron PTFE sample particulate filter, with the following software settings: Automatic response time ON, Minimum response time set to 60 seconds (RT+2), and with or without any of the following options:
 Internal Permeation Oven
 Connection for Silica Gel Dryer
 RS232-422 interface
 EV34 valve
 Internal Printer

Note: In addition to the standard U.S. electrical power voltage and frequency (115 Vac, 60 Hz), this analyzer is approved for use, with proper factory configuration, on 50 Hertz line frequency and any of the following voltage ranges: 98-126 Vac (115 nominal) and 195-246 Vac (230 volts nominal).

This method is available from Environmental S.A., 111, Bd Robespierre, 78300 Poissy, France or from Environment U.S.A., 570 Higuera Street, Suite 25, San Luis Obispo,

California 93401. A notice of receipt of application for this method appeared in the **Federal Register**, Volume 60, January 31, 1995, page 5919.

A test analyzer representative of this method has been tested by the applicant, in accordance with the test procedures specified in 40 CFR part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with part 53, that this method should be designated as a reference method. The information submitted by the applicant will be kept on file at EPA's National Exposure Research Laboratory, Research Triangle Park, North Carolina 27711, and will be available for inspection to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference method, this method is acceptable for use by States and other air monitoring agencies under requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any limitations (e.g., operating range) specified in the applicable designation (see description of the method above). Vendor modifications of a designated method used for purposes of part 58 are permitted only with prior approval of EPA, as provided in part 53. Provisions concerning modification of such methods by users are specified under section 2.8 of appendix C to 40 part 58 (Modifications of Methods by Users).

In general, this designation applies to any analyzer which is identical to the analyzer described in the designation. In many cases, similar analyzers manufactured prior to the designation may be upgraded (e.g., by minor modification or by substitution of a new operation or instruction manual) so as to be identical to the designated method and thus achieve designation status at a modest cost. The manufacturer should

be consulted to determine the feasibility of such upgrading.

Part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in table B-1 of part 53 for at least one year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with part 53.

(5) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the analyzers has been canceled or if adjustment of the analyzers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representation), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received

notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, National Exposure Research Laboratory, Department E (MD-77), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this reference method will provide assistance to the States in establishing and operating their air quality surveillance systems under part 58. Technical questions concerning the method should be directed to the manufacturer. Additional information concerning this action may be obtained from Frank F. McElroy, Air Measurements Research Division (MD-77), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, (919) 541-2622.

Dated: July 12, 1995.

Joseph Alexander,

Assistant Administrator for Research and Development.

Notice of Open Meeting of the Federal Facilities Environmental Restoration Dialogue Committee

AGENCY: Environmental Protection Agency.

ACTION: FACA Committee Meeting—Federal Facilities Environmental Restoration Dialogue Committee.

SUMMARY: As required by Section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), we are giving notice of the next meeting of the Federal Facilities Environmental Restoration Dialogue Committee. The meeting is open to the public without advance registration.

The purpose of the meeting is to discuss issues related to improving the Federal facilities environmental restoration process.

DATES: The meeting will be held on August 1, 1995, from 8 a.m. until 5 p.m. and on August 2, 1995, from 8 a.m. until 5 p.m.

ADDRESSES: The meeting will be held at the Grand Hyatt Hotel, 1000 H Street, SW., Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Persons needing further information on the meeting or on the Federal Facilities Environmental Restoration Dialogue Committee should contact Sven-Erik Kaiser, Federal Facilities Restoration and Reuse Office (5101), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (202) 260-5138.

Dated: July 17, 1995.

Sven-Erik Kaiser,

Designated Federal Official.

[FRL-5264-4]

Vermont: Adequacy Determination of State/Tribal Municipal Solid Waste Permit Program

AGENCY: Environmental Protection Agency.

ACTION: Notice of Tentative Determination to Fully Approve the Adequacy of the State of Vermont's Municipal Solid Waste Permitting Program, Public Hearing and Public Comment Period.

SUMMARY: Section 4005(c)(1)(B) of the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments (HSWA) of 1984, 42 U.S.C. 6945(c)(1)(B), requires states to develop and implement permit programs to ensure that municipal solid waste landfills (MSWLFs), which may receive hazardous household waste or small quantity generator hazardous waste, will comply with the revised Federal MSWLF Criteria (40 CFR part 258). RCRA Section 4005(c)(1)(C), 42 U.S.C. 6945(c)(1)(C), requires the Environmental Protection Agency (EPA) to determine whether states have adequate "permit" programs for MSWLFs, but does not mandate issuance of a rule for such determinations. EPA has drafted and is in the process of proposing a State/Tribal Implementation Rule (STIR) that will provide procedures by which EPA will approve, or partially approve, State/Tribal landfill permit programs. The Agency intends to approve adequate State/Tribal MSWLF permit programs as applications are submitted. Thus, these approvals are not dependent on final promulgation of the STIR. Prior to promulgation of the STIR, adequacy determinations will be made based on the statutory authorities and

requirements. In addition, States/Tribes may use the draft STIR as an aid in interpreting these requirements. The Agency believes that early approvals have an important benefit. Approved State/Tribe permit programs provide for interaction between the State/Tribe and the owner/operator regarding site-specific permit conditions. Only those owners/operators located in States/Tribes with approved permit programs can use the site-specific flexibilities provided by 40 CFR Part 258 to the extent the State/Tribal permit program allows such flexibility. EPA notes that, regardless of the approval status of a State/Tribe and the permit status of any facility, the federal landfill criteria shall apply to all permitted and unpermitted MSWLF facilities.

The State of Vermont has applied for a determination of adequacy under section 4005(c)(1)(C) of RCRA, 42 U.S.C. 6945(c)(1)(C). EPA Region I has reviewed Vermont's MSWLF permit program adequacy application and has made a tentative determination that all portions of Vermont's MSWLF permit program are adequate to assure compliance with the revised MSWLF Criteria. (In statutes and rules of the State of Vermont "certification" is substituted for the term, "permitting program." References herein to the State Permitting Program pertain to the Vermont Certification Program.) Vermont's application for program adequacy determination is available for public review and comment at the places listed in the **ADDRESSES** section below during regular office hours.

Although RCRA does not require EPA to hold a public hearing on a determination to approve any State/Tribe's MSWLF permit program, EPA Region I has tentatively scheduled a public hearing on this determination. If a sufficient number of persons express interest in participating in a hearing by writing to the EPA Region I Solid Waste Program or calling the contact given below within 30 days of the date of publication of this notice, EPA Region I will hold a hearing, in Montpelier, Vermont, on the date given below in the "DATES" section. EPA Region I will notify all persons who submit comments on this notice if it appears that there is sufficient public interest to warrant a hearing. In addition, anyone who wishes to learn whether the hearing will be held may call the person listed in the **CONTACTS** section below.

DATES: All comments on Vermont's application for a determination of adequacy must be received by the close of business on August 25, 1995. If there is sufficient interest, a public hearing
