

Because these active ingredients are likely to disappear with their product registration, the Agency has deferred for 90 days the cancellation of these 4 registrations. During that time those registrants or other affected persons may make arrangements to continue the registration.

We encourage individual users or user groups who are concerned about the potential loss of these active ingredients to work directly with the registrant identified by the first 6 digits of the Reg. No. in Table 1 to persuade them to

continue to support the ingredient, or to identify third parties who would be willing to support the ingredient if the registration were transferred to them. The full names and addresses of current registrants appear in Table 2 below. We also encourage users to consult with the Cooperative Extension Service or other local sources to identify alternatives to these active ingredients.

If the Agency is notified within 90 days of this notice at the address given above either (1) that the registrant will continue to support the registration, or

(2) that an agreement has been reached to transfer the registration to another party, we will reinstate the registration to full active status as soon as the delinquent maintenance fee payment is received. It should be emphasized, however, that any such registrations would still be subject to all requirements for reregistration, including reregistration fees (except as they may be reduced through the statutory provisions for small businesses or low volume uses).

In addition to publishing this notice in the **Federal Register**, we are sending it directly to the States, to the U.S. Department of Agriculture, and to other parties who have previously expressed concern for minor uses. They should be receiving the notice at approximately the same time it is published. We hope that this extraordinary notification effort, and the deferral of cancellations for the most sensitive registrations, will serve to prevent any avoidable loss of critical minor use pesticides.

Because so many registrations are involved, it would be impractical to list those which have been canceled in this notice. Complete lists of registrations canceled for non-payment of the maintenance fee will, however, be available for reference during normal business hours in the OPP Public Docket, Room 1128, Crystal Mall 2, 1921 Jefferson Davis Highway South, Arlington VA, and at each EPA Regional Office. Product-specific status inquiries may be made by telephone by calling toll-free 1-800-444-7255.
