

mixed waste be treated before disposal. The Nevada Test Site would only, therefore, be a reasonable alternative for Mound waste already treated at another facility. DOE has not yet decided to what extent the Nevada Test Site would be used for future disposal of offsite waste; such decisions will be made after completion of the Environmental Restoration and Waste Management Programmatic Environmental Impact Statement and the Nevada Test Site Sitewide Environmental Impact Statement.

Proposed Determination: Based on the information and the analysis in the environmental assessment, DOE believes the proposed action (i.e., operation of the Glass Melter for treatment of backlog mixed waste only) does not constitute a major Federal action that would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act. Therefore, the preparation of an environmental impact statement is not required and the DOE is issuing this finding of no significant impact.

Issued in Miamisburg, Ohio, on July 26, 1995.
