

Maybelle Uranium Mill Tailings construction site. For a period of 90 days from the date of publication of this notice, all parties who wish to submit comments, suggestions, or objections in connection with this proposed withdrawal, or to request a public meeting, may present their views in writing to the Colorado State Director. If the authorized officer determines that a meeting should be held, the meeting will be scheduled and conducted in accordance with 43 CFR 2310.3-1(c)(2).

This application will be processed in accordance with the regulations set forth in 43 CFR 2310.

For a period of two years from the date of publication in the **Federal Register**, these lands will be segregated from operation of the public land laws, including the mining laws, as specified above, unless the application is denied or cancelled or the withdrawal is approved prior to that date. During this period the Bureau of Land Management, in conjunction with the Department of Energy, will continue to manage these lands.

Jenny L. Saunders,

Realty Officer.

Fish and Wildlife Service

Notice of Availability of the Final Sharon Steel Damage Settlement: A Conceptual Restoration Plan and Request for Project Proposals

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and request for project proposals.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability of the Final Conceptual Restoration Plan for restoration of migratory bird resources injured by the release of hazardous materials from the Sharon Steel and Midvale Slag Superfund sites, along the Jordan River in Salt Lake County, Utah. The Conceptual Restoration Plan outlines a process for preparing, identifying and selecting cooperative riparian habitat restoration projects and includes application requirements. Project proposals are due by November 1, 1995. **DATES:** Cooperative project proposals will be accepted until November 1, 1995.

ADDRESSES: Requests for copies of the Final Conceptual Restoration Plan and submission of project proposals or materials may be made to: U.S. Fish and Wildlife Service, Salt Lake City Field

Office, Lincoln Plaza, 145 East 1300 South, Suite 404, Salt Lake City, Utah 84115.

FOR FURTHER INFORMATION CONTACT: Robert D. Williams, Assistant Field Supervisor, or Brandt Gutermuth, environmental contaminants program, Salt Lake City Field Office (see **ADDRESSES** section) telephone 801-524-5001 ext. 139.

SUPPLEMENTARY INFORMATION: In 1991, the Department of the Interior and the Fish and Wildlife Service received a \$2.3 million damage settlement in compensation for injuries to migratory birds and endangered species along the Jordan River, Utah, caused by the release of hazardous substances from the Sharon Steel and Midvale Slag Superfund sites. Under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) guidelines, the Service must use this money to restore, replace, or acquire the equivalent of the trust resources injured on site and/or by contaminants released from the site.

The Final Conceptual Restoration Plan was developed in cooperation and coordination with the State of Utah under authority of a 1991 Memorandum of Understanding and was developed in accordance with Natural Resource Damage Assessment regulations promulgated by the Department and codified at 43 CFR part 11.

Announcement of the Draft Conceptual Restoration Plan was published in the **Federal Register** on January 24, 1995, and a public review period extended from that date to March 31, 1995. The Final Conceptual Restoration Plan has been revised to reflect comments received during this review period.

The Conceptual Restoration Plan for the Sharon Steel and Midvale Slag Superfund sites in Salt Lake County proposes natural resource restoration through Service partnerships with Federal, State, and local governments, as well as the environmental community. The Plan provides background on injuries to trust resources in the Jordan River system, identifies priority restoration activities, and presents a process for preparing, identifying, and selecting specific cooperative restoration projects. Once specific projects have been selected, a draft Restoration Plan will be prepared and made available for public review and comment. Project implementation will begin after this Restoration Plan is finalized and National Environmental Policy Act (NEPA) requirements are met.

Interested members of the public and potential project applicants are invited

to review the Final Conceptual Restoration Plan and to submit proposals. In Utah, copies are available at the Service's Ecological Services Office in Salt Lake City (see **ADDRESSES** section), the Utah Department of Environmental Quality, Division of Environmental Response and Remediation (168 North 1950 West, Salt Lake City, 84116), and the Salt Lake City Library.

Dated: August 1, 1995.

Terry T. Terrell,

Acting Regional Director, Region 6, Denver, Colorado.
