SUPPLEMENTARY INFORMATION: In accordance with the provisions of 40 CFR 268.6, EPA granted a conditional no-migration variance to DOE on November 14, 1990 (55 FR 47709). This variance allowed DOE to place hazardous waste subject to the land disposal restrictions of the Resource Conservation and Recovery Act (RCRA) in the WIPP for the limited purposes of below-ground testing and experimentation over a ten year period. In 1993, DOE cancelled the proposed test period, after a determination that the tests and experiments could be done faster and more cheaply above ground. As a result, the 1990 determination was made moot, and DOE was informed that a new petition for a long-term demonstration would need to be submitted and approved before any waste could be accepted at the facility. The draft petition made available today is the first step in that approval process.

EPA is aware that this draft petition is not complete, in that all of the required information for a long-term demonstration is not contained in the document. This petition covers only the disposal phase of the project (the first twenty five years of operation of the facility), and does not address the long-term post-closure performance of the repository. DOE has noted that it intends to submit the portion of the petition that addresses the long-term migration potential in June, 1996. EPA has provided guidance to DOE on the requirements for submitting a complete petition through the Agency's guidance document entitled "No-Migration Variance to the Hazardous Waste Land Disposal Prohibitions: A Guidance Manual for Petitioners," and by encouraging pre-submission discussions with DOE. The Agency will also provide comments on DOE's submitted draft petition to provide early guidance to DOE. By today's **Federal Register** notice, the EPA encourages the public to provide comments that will inform its review of DOE's draft petition.

EPA also emphasizes that after the June, 1996 submission, EPA will review the full petition and determine, through

a formal rulemaking, whether to issue the variance or deny the no-migration petition. Interested members of the public will have a full opportunity to comment on the petition and EPA's review as part of the rulemaking process.
