Cowhead/Massacre Management Framework Plan; California

AGENCY: Surprise Resource Area Office, Bureau of Land Management, Interior.

ACTION: Notice of intent—proposed amendment of Cowhead/Massacre Management Framework Plan.

SUMMARY: Pursuant to 43 CFR 1601.3 and 40 CFR 1501.7, notice is hereby given that the Surprise Resource Area, Cedarville, California of the Susanville District, Bureau of Land Management, Susanville, California, will consider an amendment to the Cowhead/Massacre Management Framework Plan (MFP) adopted in 1983. This amendment will consider domestic sheep grazing and reintroduction of California bighorn sheep on an area known as the Massacre Mountain grazing allotment.

The Cowhead/Massacre MFP has several decisions related to domestic

sheep grazing and bighorn reintroduction in the Massacre Mountain Allotment. These decisions allocated adjacent portions of the allotment to existing cattle and domestic sheep operations and for the future reintroduction of California bighorn sheep. A Habitat Management Plan for a portion of the allotment was completed by the Bureau in cooperation of the Nevada Division of Wildlife in 1984 and provided for the reintroduction of California bighorn sheep into an area known as High Rock Canyon. Since the Cowhead/Massacre MFP was adopted in 1983, the general consensus among wildlife biologists and veterinarians working with domestic and bighorn sheep disease issues is that direct contact between the two types of sheep should be avoided to prevent transmission of diseases. The current Bureau of Land Management policy regarding domestic and bighorn sheep calls for a nine mile buffer between the two species.

Early in 1995, the grazing privileges associated with domestic sheep use of the Massacre Mountain Allotment were relinquished by the permittee to the Bureau of Land Management. The Nevada Division of Wildlife has requested permission to reintroduce bighorn sheep into the allotment during the winter of 1995-1996. The Reno Chapter of Nevada Bighorns Unlimited has requested that the Cowhead/Massacre be amended to prevent future licensing of domestic sheep grazing within the allotment to ensure that no direct contact between reintroduced bighorn and domestic sheep occurs in the future.

At least two alternatives will be considered in an Environmental Assessment: (1) Amend the Cowhead/Massacre MFP to only allow for cattle use on the Massacre Mountain Allotment. (2) Do not amend the MFP (No Action). Other alternatives may be developed as a result of comments received through the scoping process. An interdisciplinary team consisting of specialists in wildlife biology and rangeland management will consider the environmental issues of livestock/bighorn interactions and the appropriate class of livestock for the allotment in the analysis.

Dates: The preparation of the Environmental Assessment will be completed by September 1995 and the amendment, including public and Nevada Governor's review would be complete by November 1995.

Public Participation: Opportunities for public input and comments will be solicited through the media, a mailing, and personal contacts.
