

**SUPPLEMENTARY INFORMATION:** On May 11, 1992, Zortman Mining, Inc. (ZMI) filed an application with the Bureau of Land Management, Lewistown District Office, and the Montana Department of State Lands (part of the Montana Department of Environmental Quality as of July 1, 1995), to expand mining operations at the Zortman Mine in the Little Rocky Mountains, Montana. The proposal includes: expansion of existing mine pits to access sulfide ore; a 150-acre, 60-million ton waste rock disposal area; crushing facilities; a 2.5-mile conveyor system; a 200-acre, 80-million ton capacity leach pad; a new processing plant and ponds; a limestone quarry; and other associated facilities. Total disturbance would increase from the existing 401 acres to about 1,292 acres. The operation is located on private and public land. Issues include Native American religious concerns, acid rock drainage, reclamation, and socioeconomic.

In a March 9, 1994, Decision Record, the BLM and DEQ included the analysis of acid rock drainage corrective measures for the nearby Landusky Mine within the scope of the EIS for the Zortman Mine expansion, since acid rock drainage has been a problem at both mines. The draft EIS addresses additional mining at the Landusky and Zortman mines, as well as modified reclamation plans for both facilities to address acid rock drainage.

Public participation has occurred throughout the EIS process. A Notice of Intent was published in the **Federal Register** in November 1992 followed by a supplemental notice in April 1994 expanding the scope of the EIS for the Landusky Mine. Since that time, public meetings and informational mailings were conducted to solicit comments for the scope of the EIS. Any comments presented throughout the process have been considered.

Dated: August 2, 1995.
