

14 CFR Part 71**[Airspace Docket No. 95-AGL-5]****Modification of Class E Airspace;
Devils Lake, ND****AGENCY:** Federal Aviation
Administration (FAA), DOT.**ACTION:** Final rule.

SUMMARY: This action modifies the Class E5 airspace near Devils Lake, ND. Based on the results of an airspace review the existing geographic size of the E5 airspace area was found to be insufficient to accommodate existing instrument approach procedures to Devils Lake Municipal Airport, Devils Lake, ND. The intended effect of this action is to provide segregation of aircraft using instrument approach procedures from other aircraft operating in visual weather conditions. The area will be depicted on aeronautical charts to provide a reference for pilots operating in Visual Flight Rule (VFR) conditions.

EFFECTIVE DATE: 0901 UTC, November 9, 1995.

SUPPLEMENTARY INFORMATION:**History**

On June 9, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to modify the Class E5 airspace near Devils Lake, ND (60 FR 30479).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) modifies the Class E airspace area near Devils Lake, ND. Based on the results of an airspace review the geographic size of the E5 airspace area was found to be insufficient to

accommodate existing instrument approach procedures to Devils Lake Municipal Airport, Devils Lake, ND. The intended effect of this action is to provide segregation of aircraft using instrument approach procedures in instrument conditions from other aircraft operating in visual weather conditions. The area will be depicted on aeronautical charts to provide a reference for pilots operating in VFR conditions.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
