

Comments are invited on: (a) The need for the information (b) its practical utility, (c) the accuracy of the agency's burden estimate, and (d) ways to minimize burden on respondents. Send comments to Dr. Helen Gift, Chief, Disease Prevention and Health Promotion Branch, DEODP, NIDR, NIH, Natcher Building, Room 3AN-44D, 9000 Rockville Pike, Bethesda, MD 20892. Written comments must be received by [Federal Register insert the date 60 days following the publication.]. To request a copy of the data collection plan and instrument, call Dr. Gift on (301) 594-5579 (not a toll-free number).

**Proposed Project**

The Impact and Costs of Sealants in Young Child Populations—New—This study will assess the value (costs and effects) of providing dental sealants to the child population with erupted permanent teeth with occlusal surfaces (approximately ages 6–12) under alternative financial support programs in existing oral health care delivery systems and across two socioeconomic groups. The primary objectives of the study are to determine if various levels of dental insurance influence use of dental sealants, if costs attributable to sealants in a payment program provide value in terms of reduced caries, and if providing dental sealants to specific tooth surfaces of children merits the investment of limited resources within a larger oral health care program. The findings will provide valuable information concerning: (1) Real disease reductions possible using dental sealants for age-appropriate child populations within the existing oral health delivery system, (2) the costs of, and estimated savings from, providing sealants rather than restorative care, and (3) the marginal benefits and cost benefits of adding sealants to “normative” caries prevention efforts in age-appropriate child populations. Burden estimates are as follows:

	No. of re-spondents	No. of re-sponses per re-spondent	Avg/ bur-den/re-sponse (hours)
Parents .....	3600	4	.125
Children .....	3600	4	.129
Dentists .....	400	1	.033

Dated: August 16, 1995.

**DEPARTMENT OF THE INTERIOR**

**Bureau of Land Management**

[ID-050-1150-04]

**Closure Order: Shoshone District Bat Hibernacula**

**AGENCY:** Bureau of Land Management; Interior.  
**SUMMARY:** Pursuant to 43 CFR 8364.1, all caves in the Shoshone District identified as bat hibernation sites (hibernacula) are seasonally closed to entry. With the exception of approved research, essential search and rescue, or other emergency or administrative operations for cave resources protection, in caves containing hibernation sites, and other caves that may be identified in the future as hibernacula, are closed seasonally during the hibernation season to all visitation, from October 15 to May 1.

- Know affected caves are listed below:  
 Bat Cave  
 Chalk Cave  
 Giant Arch Cave  
 Gypsum Cave  
 Jawdropper  
 Little Arch Cave  
 Pot O' Gold Cave  
 Wedge Butte East and West Caves  
 Will's Cave

The purpose of the closure is to protect bat species and their habitat during the critical hibernation period. Any person who fails to comply with this closure and restriction order, under 43 CFR 8364.1, may be subject to the penalties provided in regulations at 43 CFR 8360.0-7; a fine not to exceed \$1,000 and/or imprisonment not to exceed 12 months.

**DATES:** This action is effective August 14, 1995.  
**ADDRESSES:** The Federal Cave Resources Protection Act of 1988 prohibits disclosure of cave locations. Information pertaining to the above closure is available at the BLM Shoshone District in Shoshone, Idaho.

**FOR FURTHER INFORMATION CONTACT:** Cave Management Coordinator Paula Perletti, BLM Shoshone District, P.O. Box 2-B, Shoshone Idaho 83352, telephone (208) 886-7254.

**SUPPLEMENTARY INFORMATION:** Certain caves in the Shoshone District are particularly attractive to bats for hibernaculum because they provide a narrow yet optimum range of temperature and other microclimatical variables required for successful hibernation. Research has indicated that all bat species are extremely susceptible and sensitive to human disturbance

during hibernation and that recreational caving trips during the hibernation season are detrimental to the survival of bat species.

The policy will be addressed in the Bennett Hills Resource Management Plan supplemental draft available 12/95.

Dated: August 14, 1995

**Express Pipeline Inc. (Express); Draft Environmental Impact Statement**

**AGENCY:** Bureau of Land Management, Interior.  
**ACTION:** Notice of Availability and Notice of Public Meetings on the Draft Environmental Impact Statement for the Express Pipeline for public review and comment.

**SUMMARY:** A Draft Environmental Impact Statement (DEIS) for Express Pipeline Inc. (Express) to construct, operate, and maintain a 24-inch pipeline on public lands to transport crude oil between Wild Horse, Alberta, Canada and Casper, Wyoming, is available for public review. The DEIS was prepared by Greystone, a third-party contractor for the Bureau of Land Management (BLM) under the provisions of Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended (NEPA). The DEIS describes and analyzes three alternatives and discloses each alternative's environmental effects. Public meetings will be held in communities along the proposed pipeline route.

**DATES:** Written comments concerning the analysis will be accepted for 60 days following the date the Environmental Protection Agency (EPA) publishes the notice of filing of the DEIS in the **Federal Register**, which is expected to be about August 18, 1995. Meetings will be held in communities along the proposed pipeline route to provide opportunities for the public to meet with representatives from the BLM and the Montana Department of Environmental Quality (DEQ), co-lead agency with BLM, and comment on the DEIS. (Representatives from DEQ will attend the Montana meetings only.) These meetings will be held in Havre, Montana, and in Casper, Wyoming, on September 11, 1995; in Lewistown, Montana, and Worland, Wyoming, on September 12, 1995; and in Billings, Montana, on September 13, 1995. The BLM will announce the specific times
