FOR FURTHER INFORMATION CONTACT: Don Ogaard, BLM Project Manager, Bureau of Land Management, Worland District Office, P.O. Box 119, 101 South 23rd Street, Worland, Wyoming 82401-0119, telephone 307-347-9871.

SUPPLEMENTARY INFORMATION: Express Pipeline, Inc. proposes to construct, operate, and maintain a 24-inch pipeline from Wild Horse (located on the border between Montana and Canada) to Casper, Wyoming, to transport Canadian crude oil. Nationwide, the demand for and consumption of petroleum in the U.S. has exceeded production for more than 20 years. In recent years, this gap has been widening as the demand for crude oil increases while domestic production declines. Because of this, the U.S. needs to locate additional, dependable sources of crude oil. The overall purpose of the proposed pipeline is to address the needs of refineries in the U.S., particularly in the Rocky Mountain Region, and the producers of Western Canada. The Express Mountain Region, and the producers of Western Canada. The Express pipeline would provide a new source of crude oil to refineries located throughout the Rocky Mountain Region and other parts of the U.S. through the existing network of pipelines.

The DEIS is not a decision document. The purpose of the DEIS is to provide sufficient information to make an informed decision about Express's proposal. It is a document disclosing the likely environmental consequences of implementing the proposed action or one of the alternatives to that action. This document describes the likely effects of constructing or not constructing the proposed pipeline.

Before Express can construct the pipeline, it must obtain numerous Federal, State, county, and local permits. Because the route crosses public land administered by the BLM

and the Bureau of Reclamation, Express must obtain a Right-of-Way Grant from the Federal Government. As part of the process for granting the permits, these agencies must consider Express's proposal under NEPA. Regulations implementing NEPA (40 CFR 1500) encourage agencies to incorporate any previous NEPA analyses by reference to eliminate repetitive discussions of the same issues and to focus on specific issues of the proposal. The proposed pipeline would follow the routes of two other pipelines for which EIS's were previously issued by Federal agencies. Accordingly, this DEIS incorporates by reference the PGT/PG&E and Altamont Natural Gas Pipeline Projects Final EIS (FERC 1991) and the Amoco Carbon Dioxide Projects Final EIS (BLM 1989).
