

Total Annual Burden: 640,000 hours.

Needs and Uses: Cable television system operators who use frequencies in the bands 108–137 and 225–400 MHz (aeronautical frequencies) are required to file a cumulative signal leakage index (CLI) derived under 47 CFR 76.611(a)(1) or the results of airspace measurements derived under 47 CFR 76.611(a)(2). This yearly filing is done in accordance with 47 CFR 76.615 on the FCC Form 320. The data is used by FCC staff to ensure the safe operation of aeronautical and marine radio services and to monitor compliance of cable aeronautical usage which will minimize future interference of these safety of life services.

Title: Section 63.16 Construction of Stand-Alone Cable System by a Carrier in its Exchange Telephone Service Area, CC Docket No. 87–266.

Form No.: N/A.

Type of Review: Extension of existing collection.

Respondents: Business and other for-profit.

Number of Respondents: 50.

Estimated Time Per Response: 1 hour per response.

Total Annual Burden: 50 hours.

Needs and Uses: The Commission finds that the public interest would be served by providing for reduced “streamlined” Section 214 authorization to local exchange telephone companies (LECs) against whom it is not enforcing the cable/telephone company cross-ownership ban, who propose to construct a cable system in their service area if the LEC is willing to certify to three facts. It must certify that (1) the cable system is a stand-alone system, (2) it will comply with Commission accounting, cost allocation, affiliate transaction rules applicable to nonregulated activities, and (3) that it has secured a franchise to provide cable service pursuant to Title VI of the Communications Act. The Commission believes that if these conditions are met, more detailed individual scrutiny of Section 214 applications would not be in the public interest.
